

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## STATE OF MAINE.

---

*To the Governor :*

The Board of Railroad Commissioners respectfully submit this, their thirty-first annual report, for the year ending November 30th 1889 :

### RAILROADS IN MAINE.

It is gratifying to be able to state that, while for certain causes the earnings of railroads in many states have fallen off and their stocks depreciated in value, the returns, made to the Board, from railroad corporations operating railroads in Maine, for the year ending September 30th 1889, show a general and more than ordinary increase in earnings over former years. This result has been accomplished, while all needed repairs and renewals have been made in maintaining the physical condition of each, and much in value added to such properties.

### NEW RAILROADS.

Nearly two hundred miles of railroad have been completed and added to the system in the State during the past year. The Canadian Pacific, formerly known as the International Railroad, a portion of which was opened to travel late in the fall of 1888, is now fully completed and regular trains have been running thereon, since the first day of June last. The construction of this one hundred and forty-five miles of railroad through our State, completes the great system of the

Canadian Pacific, extending from the Pacific to the Atlantic Ocean. Though the building of this road is not an enterprise of our own people, (the object of its construction being, undoubtedly, to more closely unite the lower with the upper provinces of the Canadian Dominion), still we trust and believe that the construction and operation of this system through our State, will greatly tend to develop our resources and cement friendly relations with our Provincial neighbors.

#### SOMERSET RAILROAD EXTENSION.

Work on the extension of the Somerset Railroad has been continued during the year and said road is now completed to Carratunk Falls, and across the Kennebec River at that point, to Solon Village; and permission to run passenger trains to the station in Solon, was granted by the Board, December 21 1889.

#### LIME ROCK RAILROAD.

The construction of the Lime Rock Railroad, which is intended mainly for the transportation of lime-rock from the quarries near Rockland, around that city, to the kilns situated on the water front, has been continued during the past year, and though not fully completed, about four miles of main and side tracks, have been added to said system, since our last report.

#### DEXTER & PISCATAQUIS RAILROAD.

The Dexter & Piscataquis Railroad Company, a corporation organized under the laws of the State, mention of which was made in our last annual report, has, during the past year, substantially completed the construction of its railroad, a distance of about sixteen miles. Said railroad, as we are informed, has been leased to the Maine Central Railroad Company, and we presume it will hereafter be included in and become a part of that system.

## BANGOR STREET RAILROAD.

A charter was granted to the Bangor Street Railway Company, during the session of the Legislature of 1887. During the Summer and Fall of 1888, a portion of its line was constructed, and in the Spring of 1889, about three miles of track were completed, upon which cars have been run regularly, since the early part of the season.

## ORGANIZATION OF RAILROAD CORPORATIONS.

Two railroad corporations have been organized during the past year, viz :—

## 1—Kennebec Central Railroad Company.

Articles of association of the above named company were approved by the Board, September 12th 1889. This company was organized for the purpose of constructing and operating a narrow gauge railroad from the village of Randolph, opposite the city of Gardiner, to the National Home for disabled volunteer soldiers, in the town of Chelsea, a distance of about five miles. A survey of the route was afterward made and the location of said road was, after notice and hearing, approved by the Board, September 27th 1889. Since said approval, as we are informed, a large portion of the grading of same has been done. (See Part III.)

## 2—The Georges Valley Railroad Company.

This corporation is organized for the purpose of constructing and operating a railroad from the station of the Knox & Lincoln railroad in the town of Warren, up and along the valley of the Georges river to Union Common or village, a distance of about eight miles. Articles of association, for the purpose of forming said company, were approved by this board October 4th, 1889. Since which, a survey of the route has been made, and a plan and profile of the location submitted, which, after notice and hearing by the Board, was approved November 30, 1889. (See Part III.)

### HEATING AND LIGHTING PASSENGER, MAIL AND BAGGAGE CARS.

Chapter 275, Public Laws of 1889, provides as follows :

"Sec. 1. No Passenger, Mail or Baggage Car on any railroad in this State shall be heated by any method of heating or by any furnace or heater, unless such methods or the use of such furnace or heater shall first have been approved in writing by the board of Railroad Commissioners ; provided, however, that in no event, shall a common stove be allowed in any such car ; provided also, that any railroad corporation may, with the permission of said board, make such experiments in heating their passenger cars, as said board may deem proper."

"Sec. 2. No passenger car on a railroad, shall be lighted by naphtha, nor by an illuminating oil or fluid made in part of naphtha, or which will ignite at a temperature of less than three hundred degrees Fahrenheit."

"Sec. 3. Any railroad corporation violating any of the provisions of this act, shall forfeit a sum not exceeding five hundred dollars."

Prior to the enactment of the above statute, the Board of Railroad Commissioners had, by order of the legislature of 1887, made an investigation of the methods in use in this State, of heating passenger cars ; and also, as instructed in said order, had visited other states where improved safety appliances were in use for heating same, and had made a report to the Legislature of that year, in which report the Board stated as follows :—

"While great improvements have been made in passenger cars in other respects, no material change has been made in the mode of heating them. The wood and coal stoves of a quarter of a century or more ago are still to be found on trains in this State, though some of the wealthier corporations use the Baker and Johnson heaters. The use of them is intended to contribute more to the comfort than the safety of passengers."

\* \* \* \* \*

“From the careful examinations made as above mentioned, from proved statements of interested parties having experimental knowledge of these various devices, and from the testimony of all who have given the subject consideration, the members of the Maine Board of Railroad Commissioners feel constrained to say, with the utmost confidence, that the use of inside stoves or furnaces should be universally discarded for heating railroad cars while in motion, although they may be properly retained a while longer for temporary use in cases of accidental delay or obstruction to the operation of whatever may be selected to replace them.”

\* \* \* \* \*

“While the best minds among railroad men all over this country and Europe are earnestly striving to develop the best and safest, any premature decision might seriously prejudice the most promising efforts in a right course. It is therefore respectfully submitted, as the opinion of this Board, that the several railroad companies of this State should be by law required to discard the stoves and adopt some one of the new processes for providing heat from outside, *within a reasonable time.*”

No further action having been taken by the legislature of 1887, and there appearing to be no material change being made in the methods of heating by railroad companies in this State, the Board, feeling it to be their duty to again call the attention of the Legislature to the subject, in their report of 1888, quoted a portion of their report of the previous year on said subject, and recommended such legislation as would compel all railroad corporations, operating railroads in this State, “in a reasonable time, to adopt some of the safer methods of heating.” Meanwhile, before the enactment of the statute herein quoted, the accident at Kingman on the Maine Central railroad (a full report of which is hereinafter given) occurred, in which the lives of three individuals were lost by reason of fire consuming the wrecked cars in which they were confined. That the fire originated from the stoves therein is by no means clear, because it appeared that the

locomotive ran into cars, standing on the spur track, that were loaded with hay, and that the hay was set on fire by the locomotive, and, so far as known, the fire from these hay cars may have enveloped and consumed the wrecked mail cars in which these men were confined. We can not, however, believe that the fire, which spread so rapidly over these wrecked cars, was wholly communicated from the source above mentioned, for the reason that one or more of the cars burned, fell over the opposite embankment, away from the locomotive and hay cars aforesaid.

In justice to the corporation operating this railroad, it is proper, in this connection, to state that all of the passenger cars on this train owned by the company, had been fitted so that the same could be heated by steam from the locomotive ; but the Pullman car, not owned by said railroad corporation, and the mail and baggage cars running over the several roads, on the through route from Boston to St. John, were not so fitted.

Immediately, following said accident, which occurred on the 23d day of February, the statute above mentioned was enacted, and as appears, was approved by the Governor March 8th 1889. Whereas, by operation of law, said statute was not to take effect till thirty days after the adjournment of the Legislature, which did not take place till the 13th day of March, the Board did not deem it wise or necessary at that season of the year to take action relative to the methods of heating. During the month of June, the Board desiring to be informed as to the methods in use for heating passenger, mail and baggage cars in this State, caused to be sent to the several railroad corporations operating railroads in the State, a circular of which the following is a copy :

Augusta, June, 1889.

To.....

General Manager.....

..... Railroads.

Dear Sir :

The Board of Railroad Commissioners desire to be informed as to the methods now in use, for heating passenger, mail and baggage cars on the above named Railroad in this State. Will you kindly answer the following questions, and return the same to the Board, Augusta, Me.

Respectfully yours,

D. N. MORTLAND, Chairman.

## REMARKS.

In answer to said circular, returns were received from all said railroad corporations. From a summary of returns received, the following facts appeared: That out of 659 passenger cars reported in use in this State, 164 were heated by steam from the locomotive; that of 187 mail and baggage

cars, 42 were heated in like manner, 75 by what is known as the Baker and Johnson (hot water) heaters and four by the Spear (hot air) Heater. All other cars in use were heated by what might be termed "common wood and coal stoves."

The Board upon investigation, found that a statute, similar to the one enacted in this State, had been in force in the states of Massachusetts and New Hampshire, and that the Railroad Commissioners of these states had approved all methods of heating cars, other than by what might be called "common stoves." As the railroad system of this State is so connected with those of Massachusetts and New Hampshire, and as passenger, mail and baggage cars are daily being exchanged, it did not seem to this Board to be wise or expedient to adopt a rule or regulation, as to approvals, differing from that adopted in those other states, acting under like or similar statutes. The Board, therefore, feeling that, as the method of heating cars was necessarily in a transitional and experimental state, and that the best methods of heating may not yet have been devised, determined to temporarily approve all methods which had been approved by the Commissioners of the above named states, and such other heaters as railroad corporations might desire to use, other than common stoves. Accordingly notice of a meeting of the Board, to be held at their office in Augusta, on the 28th and 29th of August, was given to railroad managers and all other persons interested in said subject, as follows:—

STATE OF MAINE.  
R. R. COMMISSIONERS' OFFICE, }  
AUGUSTA, Aug. 10th 1889.

*To the General Managers and Superintendents of the several Railroads in Maine:—*

You attention is hereby respectfully called to Chapter 275 Public Laws of 1889, relating to heating and lighting passenger, mail and baggage cars on railroads, and notice is hereby given that the Board of Railroad Commissioners will be in session at their office in Augusta, on Wednesday and

Thursday, Aug. 28th and 29th 1889, for the purpose of hearing all persons and parties interested in said subject, and determining the methods that may be used in heating cars as aforesaid, in this State.

Per order of the Board,

E. C. FARRINGTON, *Clerk.*

At said meeting, a hearing was given to inventors and all other persons and parties interested, who desired to be heard relative to same. After the hearing, a circular was sent by order of the Board, to the several railroad corporations operating railroads in this State, as follows :

OFFICE OF RAILROAD COMMISSIONERS,

AUGUSTA, August 29, 1889.

*To the General Managers and Superintendents of Railroads in the State of Maine.*

GENTLEMEN :—Section 1 of Chapter 275, Public Laws of 1889, provides as follows :

“No passenger, mail or baggage car, on any railroad in this State, shall be heated by any method of heating, or by any furnace or heater, unless such method or the use of such furnace or heater shall first have been approved in writing by the Board of Railroad Commissioners :” \* \* \*

Notice is hereby given that the Board of Railroad Commissioners will be in session at their office in Augusta, on Saturday, the 7th day of September, 1889, at ten o'clock in the forenoon, for the purpose of receiving and considering applications for approval of methods of heating as provided above. All applications must be in writing, and shall fully state the methods and character of the heater, which such applicant desires to adopt, and the purposes for which the same shall be used.

Per order of Board,

E. C. FARRINGTON, *Clerk.*

In response to said circular, applications were received from the Maine Central, Boston & Maine, Portland & Rochester, Knox & Lincoln, Rumford Falls & Buckfield and New Brunswick railroad companies, asking an approval of the Sewall system of steam heating, together with other heaters (not common stoves), to be used as auxiliary heaters, including the Baker and Johnson, Edwards, Spear, *et al.*

The Grand Trunk, Canadian Pacific and all other railroad corporations not mentioned above, operating railroads in the State, asked permission to use some of the last named heaters, solely in all of such cars belonging to them. These requests were granted and the several heaters mentioned were approved by the Board and written permission given to each company, to use the same until July 1st 1890, at which date all of said approvals expire by limitation.

Railroad companies, which have attempted the use of steam from the locomotive as a means of heating their passenger, mail and baggage cars, have been greatly delayed in procuring necessary equipments and skilled mechanics to do the work. They have, too, been greatly hindered in the application of their steam heating system, by reason of being obliged to couple on and haul cars coming from other railroads not so equipped, especially the Pullman Drawing Room and Sleeping cars, which, until very recently, were all warmed by the "Baker Heater," so called. So far, the efforts made to heat trains by steam from the locomotive, have shown it to be feasible; and the methods used have been generally satisfactory to both passengers and railroad officials.

We trust that the experimental stage of testing methods of heating will soon have passed, and that steam or some other method will soon be universally adopted, so that inside heaters now used, many of which are little better than the common car stove, can be wholly discarded.

#### AUTOMATIC COUPLERS.

While satisfactory progress is being made in the operation of railroads and trains in most respects, little, if any, is be-

ing made in the methods of coupling freight cars, in this or other states.

Statistics show that the seemingly unnecessary mutilation and loss of life of men engaged in coupling and uncoupling freight cars, still goes on. The action taken by the Master Car Builder's Association, in the adoption of the "Janney type" of coupler, has, we believe, tended more to hinder than to promote the general adoption and use of automatic couplers.

At the time of the adoption of that "type" of coupler, by said association, so far as appears by reliable reports, no coupler of that type had been invented, which, when subjected to practical or physical tests, would meet the requirements of the service. For that reason, we believe the attitude of practical railroad managers was adverse to its adoption. As many improvements have since been made upon the type of coupler selected by that association, it now may be more generally adopted.

The freight traffic on railroads, in this as in other states, being interstate, few attempts, if any, have been made by our Legislature, to enact laws relative to safety appliances; neither has this Board deemed it wise to urge legislation in that respect, believing, as we do, that all attempts on the part of individual states, to legislate as to character or kind of safety appliances, especially on freight trains, must, by reason of conflicting laws, result in hindrance and loss to railroad corporations, and failure to accomplish the object desired.

#### RAILROAD EMPLOYES.

As a means of promoting the efficiency of railroad employes, and to stimulate them to faithfulness in the discharge of their duties, we believe it would be wise for railroad managers to adopt a system of grading in each department, with a corresponding compensation for each grade. Where the lives of the traveling public and the property of the corporation, depend for their preservation, upon the experience, care and faithfulness, in the discharge of the duties, with

which almost every employe is necessarily entrusted, none too great care can be exercised in their selection. Neither is it just to the employe who has for years exercised skill, care and faithfulness in the discharge of every duty entrusted to him, to have nothing held up, to which he may attain, as a reward for exercising such skill and faithfulness, by way of increased pay or promotion. We are confident that if some such policy as above outlined, should be adopted by railroad officials and managers, greater efficiency would be secured, and a better feeling would exist between employer and employe.

#### ACCIDENTS.

While we have to report that two fatal accidents have occurred to passenger trains during the past year, we are pleased to be able to state that no passenger on said trains was seriously injured, and so far as this Board is informed, no accident of a serious nature has occurred in this State, which could be attributed to defects or want of repair in tracks, bridge structures or rolling stock of any railroad.

By law, it is made the duty of the Board when a serious accident occurs to any train on a railroad, to investigate the same and in their report make a full statement of the cause of such accident. Said statute, chapter 321, Public Laws of 1885 is as follows :

“When a serious accident occurs to any train on a railroad, immediate notice thereof shall be given in writing by the officers of the company operating such railroad, to the chairman of the board of Railroad Commissioners, who shall, if he deems the public interest to require it, cause an investigation to be made at once by said board ; and for such purpose any member of said board shall have power to send for such evidence as he believes necessary ; and said commissioners shall, in their annual report, make a full statement of the cause of such accident. The expense of such investigation, including witnesses, shall be paid from the State treasury on certificate of the Board of Commissioners. Witnesses in

all cases before said board, shall be allowed the same fees as in the Supreme Judicial Court."

Soon after the enactment of the above statute, doubts were expressed by many as to what might be considered "a serious accident" to a train on a railroad, within the meaning of the law.

That there might be no misapprehension as to the nature of an accident the Board of Commissioners would deem serious, a circular, calling attention to and quoting the said statute, was issued by the Board January 18 1888, and mailed to all railroad companies operating railroads in the State with the following interpretation thereof by the Board, viz :

1st.—"Every accident to a passenger or freight train, of an important nature, where the lives of passengers or employes on said train are lost or endangered, shall be deemed serious and notice of same shall be given."

2nd.—"Of every accident of a serious or important nature happening on any railroad in the State, the cause of which is doubtful or uncertain, immediate notice should be given."

Notwithstanding the provisions of statute and the precaution which the Board has taken to have such provisions complied with, many railroad corporations still fail to give the Board notice of such accidents. And in some instances, if given at all, it is not given till many hours after the same has occurred. Such failures to give notice to the Board may not be intentional on the part of the officers of railroad companies. We doubt if it is; but if we can rely upon newspaper reports, many such accidents have occurred to trains on railroads during the past year, of which the Board received no notice from the officers of the companies operating the same.

Undoubtedly the object of the statute in providing for such investigation and report of same is not merely to ascertain in what manner certain persons lost their lives or were injured; but that the public and the corporation operating the road should be informed of the nature and the cause of the accident,

if ascertainable, so that by the enactment of statutes or by the adoption and enforcement of rules and regulations by railroad corporations similar accidents may be prevented in the future.

If, by a strict compliance with the provisions of this statute, the safety of railroad trains, can in any degree be promoted, none can have greater reason or interest to aid in the matter than the officers and managers of railroads. Therefore we are forced to believe that the failure to notify the Board, in the instances above mentioned, is attributable to a misapprehension of the nature of the provisions of the statute by such officers, rather than to an intention to evade its requirements. Having again, herein, called attention to the law and to the Board's interpretation thereof, we trust that in the future, whenever accidents to trains, such as are above described, occur, immediate notice, of which, will be given to the Board, so that an investigation thereof may be made if deemed necessary.

#### ACCIDENT AT KINGMAN.

On the twenty-third day of March 1889, on the European and North American Division of the Maine Central Railroad, near Boyd's Mills, in the town of Kingman, a fatal accident occurred to a passenger train, in which William D. Mudgett of Dexter and John Campbell of St. John, N. B., mail agents, and Harry Goodwin of Bangor, fireman, lost their lives, and others were seriously injured.

An examination of the locality and an investigation were made by the Board in connection with a coroner's jury, at Kingman, on the twenty-seventh day of March 1889. At said investigation, it appeared from the evidence adduced, that on the morning of the accident a freight train left Mattawamkeag for Vanceboro', in charge of Conductor Frank W. Hammond, at a quarter before seven o'clock, being fifteen minutes later than the regular time for starting; that before leaving Mattawamkeag, a truck frame for a freight car was attached to the

rear end of said train, to be hauled to the siding or spur track at Boyd's Mills, in said Kingman, to be placed under a certain car there being repaired; said car frame being in charge of William H. Bither, a car inspector and repairer, who, together with one Milton Scott, a car carpenter, both in the employ of said railroad company, took passage on said train at Mattawamkeag, which arrived at the siding above named, at about eight minutes past eight o'clock, when, after doing some shifting on said siding or spur, the truck-frame aforesaid, was unshackled and left by the Conductor, on the main line, in charge of said Bither, who, having a key to the switch lock, was, as appears, permitted and, as testified to by Mr. Hammond and admitted by Bither, instructed "To see that all was right after he should put the truck-frame on the siding;" that the train aforesaid then proceeded toward Vanceboro'; that, as testified to by Hammond, before going out of sight of said switch, he saw said frame moved upon the siding, but did not see the switch thrown back.

The passenger train from Bangor, in charge of Conductor E. C. Chase, running at a speed of nearly thirty miles an hour, arrived at said siding at about 9.30 o'clock A. M. and there left the main line and ran in on said siding or spur and into certain freight or flat cars there standing, some of which, as appears, were loaded with hay. By reason of the collision, the locomotive, two mail and baggage cars and a Pullman sleeping or parlor car were thrown from the track over an embankment and crushed together with the hay cars aforesaid, all of which were immediately set on fire by the locomotive and car stoves therein and quickly consumed, thus causing the death of the persons above mentioned, as well as the destruction of much property.

From the examination of the premises and from all the evidence elicited at said hearing, we were and still are fully convinced that the accident was caused by the misplacement of the switch by Mr. Bither, the person left in charge of same, notwithstanding the fact that there was some testimony

tending to show that the switch had been tampered with, by some person unknown, after being set by Bither.

Mr. Bither testified that after the freight train left he "threw the switch for the siding; that then he and Scott shoved the truck-frame onto the siding; that he then threw the switch on the main line again". "Suppose I locked it, but have no distinct recollection. I am terribly afraid I did not"; that after throwing the switch and locking it, as he supposed, he went to work on the cars which were on the siding a short distance from the switch. Milton Scott, who was with him, testified that he "saw Bither throw the switch onto the main line and noticed that the target indicated that it was all right".

Being afterwards called, he supplemented his former testimony by saying, "That immediately after the accident and before the unburned cars were rolled away from those burning, Bither and I went to look at the switch and I picked up the lock out of the snow and gave it to Bither and he locked the switch".

Conductor Hammond, above mentioned, also testified that "he noticed that morning that the lock on the switch was out of order and that he telegraphed the fact to Kingman when he arrived at the next telegraph station".

Much of the testimony given by Bither and Scott was not consistent with that given by Conductor E. C. Chase, who was in charge of the train which met with the accident. He testified, substantially as follows: That after doing all that could be done to clear the wreck and to save lives, I examined the switch and found it in perfect order and set locked on the side track. Saw Bither and Scott near it.

I said "Oh Bither, who could have done such a thing as this and let us onto the side track"? He replied "I don't know. If it is wrong, Scott and I must have done it." They said nothing about picking up the lock out of the snow. I never heard of the fact till told here today.

From the view this Board takes of the matter, it is of little consequence whether this switch was or was not locked on

this particular occasion. All, who are acquainted with the manner of construction of such switches, know that whenever the switch is thrown and the bar or handle placed in the slot made for that purpose, whether set upon the main or side track, it will remain and hold the rails firmly in place, whether the same be locked or not, provided it is not afterward meddled with. The province of the lock is not to control the movement of the rails in any way ; but to prevent meddling with the switch after it has been set. There was no evidence tending to show that anyone meddled with the switch after it was set by Bither : neither was there much if any opportunity for anyone to do so. Therefore if the switch had been properly set, it would have so remained, whether locked or not.

While we find that want of care on the part of this man Bither was the immediate cause of the accident, it is by law our duty to go further and inquire what other act or acts, if any, of other persons, contributed to or in any way led up to the final result.

Did Conductor Hammond do his duty in the premises? Rule 144, issued by the Maine Central Railroad Company to employes, is as follows : "Whoever throws a switch on a side track must see it back on the main line and locked." Another rule of this company requires that "Conductors must know that each switch which has been changed for his train, is left right and locked for the main line, unless it be in charge of a regular switch-man, or the conductor of a following train is present and takes charge." The testimony in this case showed that the truck-frame was attached to the rear of Hammond's train and hauled from Mattawamkeag to the above mentioned siding. If the rules above quoted had been strictly followed by Mr. Hammond, would he not have seen that the truck-frame was removed from the main line and put upon the siding "and the switch left right and locked"? If that had been done, Bither would have had no cause to open it again to remove the truck-frame from the

main line. He was not "a regular switchman" and as we view it, ought not to have been instructed with the duty or privilege of removing the said truck from the main line as above stated; but clearly, this ought to have been done by the person in charge of the train who hauled it there, even if the rules did not require it. The integrity of the main lines of railroads over which so many human beings are being daily and hourly swiftly carried, ought not to be intrusted to the care of irresponsible parties, though they be employes of the company who may happen to have by chance, switch keys in their pockets, but to men specially designated.

In view of the facts disclosed in this investigation we would suggest to managers of railroads in this State, and request them to carefully consider whether or not some rule or rules can be adopted and enforced that will more effectually guard the use of switches.

We are confident that more accidents have occurred during the past year to trains, by reason of misplaced switches, than from any other single cause.

#### ACCIDENT NEAR OAKLAND.

On the tenth day of June 1889, a serious accident occurred on the Maine Central Railroad, near the village of Oakland, to the regular passenger train from Portland *via* Lewiston to Skowhegan, in which Roscoe W. Stevens, Express Agent of Skowhegan was killed, and A. S. Libby, Mail Agent of Portland and ——— Patterson, Baggage Master of Belfast were severely injured; all of whom were in the mail and baggage car, which, as hereinafter appears, was, by reason of the washing away of the road-bed embankment, derailed and wrecked, together with the locomotive and tender.

The Board having been notified of the same, went to the place of accident, on the twelfth, and carefully examined the premises. From said examination, the cause of the accident seemed so apparent, the Board deemed a further investigation unnecessary.

On the day of said accident at about three o'clock in the afternoon, a sudden, violent and unusual storm passed over that vicinity. At the place where the accident occurred, a stone culvert, sufficiently large for the ordinary flow of water at all seasons of the year, if unobstructed, had been placed under the railroad embankment, across and over a small brook. Above and westward of said culvert and embankment, there is a ravine or gully extending a long distance, which, two or three rods above the culvert, is much wider than where the railroad embankment crosses. This ravine or gully was at the time covered by a thick growth of trees and underbrush, under which, as the Board believes from the indications, a large accumulation of leaves, brush and partially decayed vegetation had collected, and, by the sudden and unusual rush of water through the ravine, was floated down and into the culvert aforesaid, thereby choking it and making a dam of the embankment, which, being composed largely of coarse gravel, soon yielded to the pressure caused by said overflow, and a rod or more of it was washed away immediately before the arrival of the train above mentioned at that point. Because of the grade and curve southerly of this point, the washout could not be seen by a person on an approaching train, till within a very short distance of it, so short that a train, running at an ordinary rate of speed could not be stopped quickly enough to prevent it from running into same. It appeared that the locomotive of the train passed nearly over the excavation before it was derailed, though the tender dropped into the same; and upon it, the mail and baggage car, in which the persons above named were riding, fell, and was overturned and crushed. None of the passenger cars were derailed, and so far as we have learned, no passenger was materially injured. That this accident could have been prevented by ordinary care or foresight, we cannot believe. The embankment was of good width and well settled, and, so far as it appeared, the culvert was of sufficient size, well built and had remained intact, so far as known, through the frosts and floods of nearly, if not

quite forty years. That both would have remained as heretofore under all ordinary circumstances, we have no doubt.

The rain-fall of that day and hour in that locality, in intensity, suddenness and amount, far exceeded what ordinarily might be expected. That it produced the result we have tried to describe, we can not doubt. Therefore we do not find that this accident was, in any way, attributable to want of care or misconduct on the part of the corporation operating the road, or to any of its employees.

In this connection, however, we recommend that in all cases, during and after such sudden and unusual rain-falls as above described, trains be run at a slow rate of speed till section-men or others have had an opportunity to pass over and inspect the track.

#### OFFICE FOR THE BOARD.

Section 1 of chapter 313 of the public laws of 1889, provides that the Board of Railroad Commissioners "shall be provided with an office and suitable rooms for hearings in which its records shall be kept." There being no suitable unoccupied rooms at the State House, the Executive Department, by their order, instructed the Superintendent of Public Buildings to procure suitable rooms for the use of the Board in the city of Augusta. Acting under said order, the Superintendent procured two of the rooms formerly occupied by the Maine Central Railroad Company in their station building in Augusta. These rooms have been refinished and arranged by the owners for the special needs of the Board, and are comfortable and convenient.

The Board has long felt the need of an office in which their books, records, maps, papers and other materials connected with said office might be kept, and also suitable rooms for hearings, which are provided for by law, might be held. These wants have been fully supplied by the provisions above mentioned, except that no safe place is provided to deposit records and papers valuable to both the public and railroad

corporations. When the addition to the State House is completed, we trust that such arrangements will be made that the Board will be provided with suitable rooms there, for hearings and for the safe deposit of the records and papers above mentioned.

#### Total Accidents.

The following is a summary of the total number of accidents which have occurred during the year :

	Killed.	Injured.
Passengers,	3	3
Employes,	6	15
Others,	22	10
	<hr/> 31	<hr/> 28

### Physical Condition of Railroads in Maine.

---

#### BANGOR AND PISCATAQUIS RAILROAD.

To the above named system is now added the line extending from Milo Junction to Katahdin Iron Works, formerly known as the Bangor and Katahdin Iron Works Railway, 18.90 miles in length, making in all 95.40 miles of railroad operated by this company. During the past season 905 tons of new steel rails, and 25,441 new ties have been laid, and 1,700 feet of new side tracks built. Beal's Rips bridge, two spans of 130 feet each, and the long trestle bridge between Monson Junction and Blanchard, have been entirely rebuilt; also the bridge at Roaring brook on the Katahdin Iron Works Branch. Many other smaller bridges have been repaired and strengthened. Several thousand yards of ballast have been put upon the road-bed, and a large amount of ditching has been done. A new passenger station has been built at Sebec, and another at the junction with the Canadian Pacific Railroad at Brownville. Many other station buildings at different points along the line have received necessary repairs. Five miles of new fence has been built. The rolling stock of the road is in good order. Several of the passenger cars and one baggage car have been fitted with the Baker Heater. The track is in good alignment and surface, and the road has been greatly improved in all respects. One new passenger car has been purchased and twenty freight cars rebuilt.

#### BANGOR STREET RAILROAD. (ELECTRIC.)

This road was opened for travel May 21st of the present year, and has been in successful operation since that date. The track is laid through the principal business streets of Bangor, and along the Hampden road to the town line between Bangor and Hampden. The entire length of the line is 3.18

miles. The track is laid with tram rails, 35 pounds to the yard, and is in good order in every respect. The cars are run at the rate of six miles per hour. The rolling stock consists of five motor cars and four open cars. No accident has occurred since the road has been operated.

#### BOSTON AND MAINE RAILROAD.

The Eastern Division consists of the line from Portland to Portsmouth, and a portion of the Portsmouth, Great Falls and Conway Road. During the past season seven miles of new steel rails, 67 pounds to the yard, have been laid in the main line of the Eastern Division between Portland and Portsmouth. The track is in good alignment and surface and well ballasted. The road-bed is wide, and for the greater part well ditched and drained. The bridges, with the exception of the pile bridges at Portland and Portsmouth, and the two between North and South Berwick, are iron superstructures, resting upon first-class masonry, and are in good order. Most of the wooden stringers on open culverts and waterways have been replaced by iron I beams. The pile bridges at Portland and Portsmouth are in good condition. The pile bridges at North-Berwick and Great Works rivers, between North Berwick and Conway Junction, (although safe for the present) should be re-built at an early day. The station buildings along the line are convenient, comfortable and well maintained. Distance from Portland to Portsmouth, 51 miles, 50.75 miles in Maine.

The Portsmouth, Great Falls and Conway Branch diverges from the main line of the Eastern Division at Conway Junction, and extends to North Conway, New Hampshire, where it connects with the Portland and Ogdensburg railroad; only 2.92 miles are within the limits of this State. The road is in good condition, well ballasted and ditched. There are three bridges between Conway Junction and Salmon Falls; an iron plate girder over the Great Works stream, one wooden bridge over highway at South Berwick, and one wooden

truss over the river at Salmon Falls, all resting upon piers and abutments of first-class masonry. In addition to the above, there are two wooden truss bridges at the State line near Milton, New Hampshire; all are in good condition. The track is laid with steel rails, upon good sound sleepers; The station buildings are comfortable, and are kept in good order. The rolling stock upon the Eastern Division is first-class in every respect.

#### BOSTON AND MAINE. (WESTERN DIVISION.)

The Western Division of the Boston and Maine Railroad, within the limits of this State, is composed of the line from Portland *via* Old Orchard, etc., to the State line at Salmon Falls 44 miles in this State, and the Kennebunk and Kennebunkport Branch 4.5 miles in length. The main line of this road is in a very satisfactory condition. The road-bed is wide and well ballasted, ditched and drained, and the location between the fences cleared of trees and bushes. A double track extends from Portland to West Biddeford, and the track for the entire distance between Portland and Salmon Falls, is in good alignment and surface. The pile bridges at Portland and Scarboro' marshes, receive all necessary repairs and are in good order. With the exception of the bridges above mentioned, the bridges upon the line are constructed of iron, of approved designs, and supported upon abutments and piers of first-class masonry. Since the date of our last report, the double track iron bridge at Salmon Falls has been completed. The superstructure is a model of strength and durability, and the masonry is massive and first-class. During the past year six miles of track has been re-laid with heavy steel rails. The station buildings along the line are in good condition, and particular attention is paid to cleanliness, conducive to the comfort and convenience of passengers. The Kennebunk and Kennebunkport Branch is in fair condition. The road-bed is well formed with good ditches and drains. The track is in fair alignment and surface, and well

ballasted. There are several pile bridges along the line, most of them in good order, but the two next south of the station at Kennebunk should be re-built or filled the coming summer. The station buildings are comfortable and are kept in good order. The rolling stock of the Boston and Maine Railroad is in every respect first class.

#### BIDDEFORD AND SACO RAILROAD. (HORSE.)

From Biddeford to Old Orchard Beach, 5.72 miles. This road was opened for travel in July 1888, and has continued in successful operation since that time. The road is located through the main streets of Biddeford and Saco, and along the county road from Saco to Old Orchard. The road is well constructed; the cars are very good and comfortable; the horses are well cared for and treated kindly. The company have a large well arranged, and comfortable stable in Saco.

#### BRIDGTON AND SACO RIVER RAILROAD.

From Bridgton to a junction with the Portland and Ogdensburg Railroad at Hiram, sixteen miles. Gauge two feet.

This road is maintained in the same good condition as stated in our report of last year. The road-bed is well graded and ditched with ample culverts and water ways to secure good drainage. The track is well aligned, surfaced, and ballasted. The rails are steel, and the ties mostly sound and good; the road rides well; the station buildings are comfortable and convenient; the rolling stock is very good.

#### CANADIAN PACIFIC RAILWAY.

Since the date of our last report, this line of road has been completed from the west line of the State to a connection with the European and North American Division of the Maine Central Railroad at Mattawamkeag. That portion of the road between the west line of the State and Greenville at the foot of Moosehead lake was opened for business in Decem-

ber, 1888, and the division between Greenville and Mattawamkeag was opened for travel the first day of June, 1889. The road is thoroughly built in every respect, and no expense has been spared to secure safety and permanency in the construction of all its parts so far as completed. The road-bed is wide, well ditched and drained. A large proportion of the bridges are of steel superstructure supported by abutments and piers of first-class masonry. There are two steel trestle bridges, one at Wilson stream, 900 feet in length, and 114 feet high, the other at Ship pond 1,400 feet in length, 124 feet in height, and each trestle rests upon foundation piers of solid first-class masonry. The decks of the bridges are built of hard pine timber and every precaution has been adopted to insure the safety of trains. There are a large number of wooden trestle and pile bridges along the line; several have been built for temporary use, to be replaced by earth embankments or iron bridges, but all are built in a substantial and workmanlike manner, and with due regard to the safety of the trains. The track is laid with steel rails (60 pounds to the yard) upon good ties of uniform dimensions, but the ballasting is not fully completed. Good and convenient station buildings have been built at Moose river and Brownville, and others are in process of erection at the foot of Moosehead lake and at other points along the road. The rolling stock is first class in all respects.

#### FRANKLIN AND MEGANTIC RAILROAD.

From Strong to Kingfield 15 miles. Gauge 2 feet. During the past season the track and road-bed of this road has been improved by surfacing, aligning, and some ballasting. The track is laid with steel rails, and the ties are generally good. About 1000 ties have been laid during the year. The track is for the most part well ballasted. At our examination this year, we found that several of the trestle bridges needed repairing and strengthening, and notice was served on the manager to that effect. The station buildings are comfortable, and the rolling stock is in fair condition.

**FRYEBURG HORSE RAILROAD.**

From station of the Portland and Ogdensburg Railroad at Fryeburg to Martha's Grove, three miles. This road was built in the year 1888, but as the Company has failed to make returns to the Board until the present season, it has not been mentioned in former reports. The road is well built and has proved a great convenience to the citizens of Fryeburg and the summer visitors to that attractive town. The track is laid with steel rails, sixteen pounds to the yard, upon good stringers secured by cross ties. The Company intended to operate the road during the season of pleasure travel only, but as it has proved a great convenience to travellers arriving and departing by railroad, it has been found necessary to operate it between the station and the village the entire year.

**GRAND TRUNK RAILWAY.**

To the above named system is now added the Lewiston and Auburn Branch, 5.50 miles in length, and Norway Branch, 1.5 miles in length. This road continues to be maintained in the same good condition as stated in our report of last year. During the past season nine miles of new steel rails, and sixty thousand ties have been laid, and twelve miles of track ballasted. The track is in good alignment and surface, and rides very smoothly. The road is fully ballasted and well ditched and drained. The location between the fences is cleared of all trees, bushes, and rubbish of every kind, presenting a very neat appearance. A new iron plate girder has taken the place of the wooden stringers at the road bridge at Mechanic Falls. The bridges (with one exception) are constructed of iron and the masonry is mostly first-class. Some of the station buildings are new and in good order, but the others are old and inconvenient. The rolling stock is first-class and in good condition. The above statements apply also to the Lewiston and Auburn, and Norway branches.

**GREEN MOUNTAIN RAILWAY. (MOUNT DESERT.)**

This road is open for business only about three months in the year, or during the season of pleasure travel, and it is maintained in good condition. Many new cross-ties and stringers have been laid this year. Every precaution is taken to insure the safety of the train, and no accident has ever occurred. The rolling stock is in good condition.

**KNOX AND LINCOLN RAILROAD.**

It affords us pleasure to report the continued improvement in the condition of this road. During the past year 859 tons of steel rails, and 8,000 cedar ties have been laid, thus completing the entire renewal of the track with steel rails from Woolwich to Rockland. With the above mentioned improvements, the track, if properly aligned and surfaced, would compare favorably with any in the State. A construction and gravel train has been run nearly five months, and a large amount of ballast has been placed upon the road-bed, greatly improving it. Twenty-four hundred feet of side-tracks have been laid. Much attention has been given to ditching and draining. A large granite culvert of superior workmanship has been built at Ward's brook, near Wiscasset. About 80,000 feet of hard pine timber has been used in repairing and renewing the bridges at different points, and all are in safe and very satisfactory condition. The bridge masonry is generally first-class. About five miles of wire fence has been built. A new passenger station has been built at Warren, and 2500 feet of platforms at different points. New track scales have been put in at Rockland, and the wharves at Bath and Woolwich extensively repaired. The station grounds at Wiscasset have been enlarged, adding greatly to the convenience of loading and unloading freight. The rolling stock is mostly first-class. The cars are nearly all heated by the Sewall system of steam heating from the locomotive.

**LIME ROCK RAILROAD. (ROCKLAND, MAINE.)**

This road is about eight miles long. The road has been in successful operation the past year, and is fully answering the anticipations of its projectors. It is substantially built throughout its entire length. The track on the main line is laid with steel rails, sixty pounds to the yard, and on the trestles with fifty pound steel rails. During the past year the track has been aligned, surfaced, and ballasted. Some attention has been given to ditching, and solid embankments of stone and earth have taken the place of several temporary trestle bridges. The main trestles along the shore, about two miles in length, with side tracks to the kilns, have been completed in a very substantial and workmanlike manner, being built entirely of hard pine timber, and are very safe and reliable structures, creditable to all concerned in its construction. No passengers are carried upon this road, and the cars are only adapted to the transportation of lime-rock.

**LEWISTON AND AUBURN HORSE RAILROAD.**

The portion of the track laid in the streets of Lewiston and Auburn is in good condition, and the road extending to Lake Auburn has been improved. The track has been aligned and surfaced, and the road-bed filled and levelled, making it safer and better footing for the horses. A branch line has been built from the main line, to the Grand Trunk station in Auburn. The horses are in good condition and well cared for. The cars are comfortable, kept clean, and in good repair.

**MAINE CENTRAL RAILROAD, BRANCHES AND LEASED LINES.**

Under the above heading is included the road from Portland, via Augusta and Waterville to Bangor; the European and North American Railway, from Bangor to the State line at Vanceboro'; the road from Cumberland Junction via Lewiston and Waterville to Skowhegan; the road from Bath to

Farmington, with branch from Crowley's Junction to Lewiston; the Belfast and Moosehead Railroad from Belfast to Burnham; the Dexter and Newport Railroad from Dexter to Newport; the Eastern Maine Railroad from Bangor to Bucksport; the Maine Shore Railroad from Bangor via Ellsworth, to Mt. Desert Ferry; the Portland and Ogdensburg Railroad, from Portland to Lunenburg, Vermont, 51 miles of which is within the limits of this State; the Enfield Branch, from Enfield to Pulp mills; the Stillwater Branch, from Orono to Stillwater.

The total number of miles operated by the Maine Central Company is six hundred and forty-seven and thirty-four one-hundredths miles; five hundred and eighty-nine miles within the limits of this State. The main lines of this road have been maintained in first-class condition, and many additions and improvements have been made. The road-bed and track from Portland to Bangor, via Brunswick, Augusta and Waterville, are in very fine condition, track well aligned, surfaced and ballasted. Among the many improvements made the past season is the replacing of the wooden bridge just east of Bowdoinham station, by an iron plate girder bridge. At Vaughn's brook, Hallowell, two spans of iron plate girder have taken the place of the wooden spans, and the long wooden span over the street at Hallowell has been replaced by a new iron span. At Two Mile Brook, just east of Augusta, the wooden span has been replaced by an iron plate girder bridge. The wooden draw span at the crossing of the Kenduskeag stream at Bangor, has been replaced by an iron girder draw span. At Sunkhaze stream between Milford and Costigan on the European and North American Division, the wooden Howe truss has been replaced by a substantial iron bridge. The track and road-bed of the European and North American Division is in good order, well aligned, surfaced and ballasted; ties sound and good. New passenger stations have been built at Passadumkeag and Lambert lake. New water stations at Lincoln, and coal sheds at Mattawamkeag.

The road from Cumberland Junction via Lewiston and Waterville to Skowhegan is in good condition. All the wooden bridges on this road have been replaced by iron structures. The track is in good line and surface, and well ballasted; ties mostly good and sound. A new, tasty and convenient passenger station building has been erected at Skowhegan with long platforms and awnings. The station yard has been graded and filled, and new side tracks laid. The road from Bath to Lewiston is in good order and compares favorably with the main line. The track is laid with steel rails, well lined, surfaced and ballasted; the road-bed is well ditched and drained. Several of the wooden bridges have been replaced by iron structures and all are in good order. That portion of the road between Crowley's and Leeds Junction is in fair condition, but needs new rails, ties and ballast. The long trestle bridge at Sabattus has been entirely re-built in a very substantial manner with hard pine timber. From Leeds Junction to Farmington, the track is in fair condition but needs to be ballasted, aligned and surfaced. The road-bed is fairly well ditched and drained. The bridges are in good order with the exception of the truss and trestle bridges at East Wilton. The truss bridge over the Sandy river at Farmington has been re-built in a thorough manner, and the long pile bridge across the intervalle has been repaired and strengthened. A very convenient passenger station with extensive platforms and awnings has been built at Bath.

The Belfast Branch has been improved. About ten miles of steel rails and many new ties have been laid, and a considerable amount of ballast has been put upon the road-bed, and ditches well cleared. The bridges are built of wood and are generally in good condition. A new passenger station has been erected at Thorndike. A new bridge has been built at the stream near Waldo station.

The Dexter and Newport Branch is in fair condition, but needs some new rails and ballast. The road-bed is wide and fairly well ditched. There are three short wooden truss bridges,

all in good order. The station buildings are comfortable and convenient. The Eastern Maine Branch, from Bangor to Bucksport is in fair condition, but needs new rails and ballast. The road-bed is narrow at some points and should be widened and ditched. The bridge across the Penobscot river at Bangor, and the two smaller bridges on the road are in good condition. The station buildings at Brewer and Bucksport are good; others at different points along the road are in fair condition.

The Maine Shore Line is in very good condition. The track is laid with steel rails, upon good ties, and well ballasted. The road-bed is well ditched and drained; the bridge superstructures are mostly iron and iron I beams are placed upon the smaller water-ways and open culverts. At Fitz pond a thorough iron span has been built and the last wooden span in the bridge at the crossing of Union river near Ellsworth has been replaced by an iron span. The station buildings are well built, comfortable and convenient.

#### PORTLAND AND OGDENSBURG RAILROAD.

At our examination of this road we found it greatly improved in every respect. Several hundred tons of new steel rails and many new ties have been laid, and the track is well aligned, surfaced and ballasted. Much attention has been given to ditching. The new road making a shorter and more direct track to the Union Station at Portland has been completed. The bridges are in good condition. Many of the station buildings have been remodelled and painted, and new awnings and platforms built. New water stations have been built at Sebago Lake and Fryeburg. Many bridges have been repaired at different points on the Maine Central system. The following named materials have been used for repairs and construction during the past season. Steel rails, about 2,607 tons, and 501 tons of iron rails; 339,600 cross ties have been laid and 15 miles of track ballasted. More than 10 miles of new side tracks have been laid, and twenty-five thousand four hundred and fifty rods of barbed wire, and

two thousand three hundred twenty-seven rods of board fence have been built. Many of the smaller water ways and culverts have received necessary repairs. Three thousand three hundred and twelve yards of granite have been used in building new masonry at different points. The locomotive equipment has been increased this year by the addition of nine new engines, eight built by the Portland Company, and one at the Maine Central shops at Waterville. One hundred and ninety cars of various kinds have been built at the Waterville shops. The rolling stock is first-class in every respect. Passenger cars for the most part are warmed by the Sewall heating system.

#### MONSON RAILROAD. (Gauge two feet).

This road was built principally for the purpose of transporting slate from the quarries at Monson. The road is maintained in good condition; the track is in good line and surface, and fairly well ballasted; the road-bed is wide and well ditched. During the past season the trestle bridge near Monson, six hundred feet in length, and averaging about fourteen feet high, has been filled with waste stone from the quarries, making a very solid and permanent embankment. Mixed trains for passengers and freight are run over this road, connecting with all regular trains on the Bangor and Piscataquis Railroad. The station buildings are in good order; the road is carefully managed and no accident has occurred.

#### NEW BRUNSWICK RAILWAY SYSTEM—Consisting of Aroostook River Railroad and the Houlton Branch.

During the past year a new floor system has been put upon the Pattee brook bridge near Fort Fairfield, and four new pile culverts have been constructed at different points. A new flag station has been built at Stevens' Mill. The track at Fort Fairfield has been raised and protected by wharfing, requiring twelve thousand feet of hemlock logs, and three thousand cubic yards of ballast. About fourteen miles of

ditching has been done. The track is laid with steel rails upon good sound ties, and is well aligned, surfaced and ballasted. The road-bed is well graded and generally well ditched and drained; the bridges are all wooden structures, and are in good condition; the station buildings are well built, comfortable and convenient; the rolling stock is first-class. The Houlton Branch diverges from the main line of the New Brunswick Railway at Debec Junction, and extends to Houlton, eight miles. Only three miles of this road are within the limits of this State. The track and road-bed are in excellent condition in every respect. There are no bridges on this branch within the limits of this State. The station buildings at Houlton are poor, and should be replaced by better structures. A new freight platform has been built at Houlton. No accidents have occurred upon this road or on the Aroostook River Railroad, resulting in injury to persons or property.

#### ORCHARD BEACH RAILROAD.

This road was built for the accommodation of summer visitors at this popular resort. The track is laid upon the sand along the beach, and is kept in a safe condition for the service required. There is but one pile bridge and that is in good condition. Open observation cars are run for the purpose of giving an unobstructed view of the ocean and outlying islands. Trains are run during the summer months only.

#### PORTLAND AND ROCHESTER RAILROAD.

This road has been maintained the past season in the same good condition as stated in our report of last year. The track is in good line and surface and well ballasted. The road-bed is wide, well graded, ditched and drained, and the location between the fences cleared of trees, bushes and rubbish. During the past year about eighty-three tons of steel rails, eleven thousand new cross ties, and twenty sets of switch ties have been laid. About four thousand feet of new side-tracks

have been laid, and sixteen safety switches with automatic stands purchased. Two miles of track have been raised and ballasted. Two cattle passes have been filled, and culverts substituted in their places. New granite abutments have been built at Elder's hay pass in Gorham, and the wooden stringers replaced by iron I beams. The track at that point has been raised and ballasted; the over-head bridge at South street has been replanked, and hard pine stringers have been laid on one span of the Saco river bridge, and the entire floor system has been repaired; the wooden stringers at Allen's hay pass in Alfred have been replaced by iron I beams. The walls of the open water-ways at Ash swamp and Jones' meadow have been re-built, and the wooden stringers replaced by iron I beams. New crossing gate-houses have been built at Ocean street, Deering, Cumberland Mills and Westbrook Junction. New platforms have been built at Westbrook, Cumberland Mills, Gorham and Springvale. Needed repairs have been made to buildings, etc., at other points. Eight miles of new fence and fourteen hundred and sixty feet of snow fence have been built. At Portland the Marginal Way wharf has been newly capped and planked, and the tracks planked between the bridges. A retaining wall one hundred and twelve feet long and fifteen feet high has been built at the Marginal Way bridge. The embankment of the Marginal Way at Portland should be widened and riprapped to protect it from the action of the water, and the sluice-ways should be re-built; the rolling stock is first-class and in good condition. One new engine, one combination car and five new platform cars have been added to the equipment, and ninety-four freight cars have been repaired and strengthened. The road is carefully and economically managed, and no accident has occurred resulting in injury to persons or property.

#### PORTLAND RAILROAD. (HORSE.)

This road is in very good condition its entire length. The paving along the city lines has been kept in thorough repair and the tracks extending out of the city have been maintained

in good line and surface. New steel rails have been laid along Pleasant street; all of the buildings at the Deering terminus have been put in good repair and painted. Two new cars have been built this season and the entire rolling stock is in good condition. The company own 223 horses, all well cared for and in excellent condition; the road is well managed; the cars are kept clean and comfortable.

#### ROCKPORT RAILROAD, (2.50 miles in length).

This road is located in the town of Camden and is used for the purpose of transporting limerock from the quarries to the kilns at the village of Rockport. The road has been in operation about three years. The track is laid with steel rails upon good cross-ties but needs to be aligned, surfaced and ballasted. The trestle bridges are in fair condition and safe for the service required of them. No passengers are carried upon this road. The rolling stock is good and adapted to the purposes for which it is used.

#### RUMFORD FALLS AND BUCKFIELD RAILROAD.

During the past season the road-bed between Sumner and Canton has been widened and raised and a portion of the track re-laid with steel rails and new cross ties, making in all twenty-one miles of steel rails. The remainder of the track is laid with iron rails and it will be necessary to renew a portion of this the coming season. The track is all well ballasted, aligned and surfaced; the bridges (with three exceptions) have all been re-built within five years, and are in good order. The Ryerson, Buckfield and Canton Mills bridges are now being repaired and strengthened. A new side track has been laid at Buckfield, and a new turn table built at Mechanic Falls. The station buildings are comfortable, convenient and in good order; the rolling stock is good, and the passenger train is equipped with the Sewall system of heating by steam from the locomotive. One car has been re-built for use on the mixed train.

**SANDY RIVER RAILROAD. (Gauge two feet).**

During the past season two hundred tons of new steel rails and seventeen thousand cedar cross-ties have been laid, making a total of six miles of steel rail track on the road. The road-bed has been raised in many places and the ditches cleared. The long high trestle bridge at Strong has been fully repaired and strengthened, and stone culverts and earth embankments have replaced wooden trestles at other points. Several of the smaller trestle bridges have been repaired and others are to be replaced by solid earth embankments. The bridge and culvert masonry is generally good, but the east abutment of the Sandy river bridge at Phillips has started a little, and should be backed up with stone to prevent further movement. The station buildings are in fair condition; the rolling stock is good. Six new freight cars have been added this year. The road is carefully managed and is constantly being improved. No accidents have occurred.

**SEBASTICOOK AND MOOSEHEAD RAILROAD.**

This road remains in about the same condition as stated in our report of last year. The track is laid with steel rails, upon good sound cedar cross-ties and fairly well ballasted. The road-bed is generally in good condition; there is but one bridge upon the line and that is in good order. The station buildings are comfortable and the rolling-stock is fair.

**SOMERSET RAILROAD.**

This road has been greatly improved during the last three years and compares very favorably with other roads in the State. A considerable portion of the track has been re-laid with steel rails upon good cross-ties, and all well ballasted. The road-bed is wide, well ditched and drained throughout its entire length; the track is in remarkable good line and surface and rides very smoothly. The modern lattice bridges over the Kennebec river at Norridgewock, Madison and the

Carrabassett stream at North Anson are in good condition, and all rest upon abutments and piers of first-class masonry. The station buildings at Norridgewock, Madison and Anson are old but in fair condition; the buildings at Embden are new and very good; the rolling stock is fair. The extension of the road from Embden to Solon is nearly completed and will be opened for traffic very soon. The bridge across the Kennebec river at Solon is an iron truss resting upon granite abutments and piers of first-class masonry. The road is well and carefully managed. No accident has occurred resulting in injury to persons or property.

#### ST. CROIX AND PENOBSCOT RAILROAD.

From Calais to Princeton, twenty-two miles, seventeen miles in Maine, five miles in the Province of New Brunswick.

This road is used principally for the transportation of lumber and other freight, but regular mixed trains are run at a low rate of speed for the accommodation of passengers. During the past season, two hundred and twenty tons of new steel rails and four thousand three hundred cedar ties have been laid, and about three thousand yards of ballast put on the road-bed. The long bridges over the St. Croix river at Baring and Sprague's Falls have been thoroughly repaired and new abutments have been built at the over-head bridge at Salmon Falls. The cast iron chairs at the points on more than two miles of track have been replaced by fish plates. The road-bed has been somewhat improved by ditching and draining, and is generally in better condition than it has been for several years. The station buildings and rolling stock are in fair condition. The road is managed with great care and with freedom from accidents.

#### WATERVILLE AND FAIRFIELD HORSE RAILROAD.

This road has been built and operated about two years. The road is well built in every respect, and the business has largely exceeded the expectations of its projectors. The cars

are first-class, and the horses are well fed and kindly treated. The company owns a large and well arranged stable at Kendall's Mills. The cars are run with regularity, and but one accident has occurred.

#### WHITNEYVILLE AND MACHIASPORT RAILROAD.

From Machiasport to Whitneyville, 7.5 miles.

This road is used only for the transportation of lumber from the mills at Whitneyville to Machiasport.

#### YORK HARBOR AND BEACH RAILROAD.

The York Harbor and Beach Railroad diverges from the main line of the Boston and Maine Railroad (Eastern Division) at the easterly end of the pile bridge between Portsmouth and Kittery, and extends to York Harbor and Beach, a distance of 11.27 miles. This road has been in successful operation for two years. The track is laid with steel rails upon good ties, and fairly well ballasted; the road-bed is well ditched and drained; the pile and trestle bridges are well built and are in good condition. The station buildings are convenient and maintained in good order.

Respectfully submitted,

D. N. MORTLAND,	} <i>Railroad</i>	
A. W. WILDES,		} <i>Commissioners</i>
ROSCOE L. BOWERS.		

AUGUSTA, December 31 1889.

## STATEMENT OF EACH ACCIDENT IN MAINE.

*October 26 1888*—At Portland, Nathan D. Fickett, a trespasser walking on the Portland bridge, was struck by a passing train, receiving injuries from which he soon afterwards died.

*December 25 1888*—At Cape Elizabeth, Richard Dodge, a boy of ten years, a trespasser, attempting to climb into a freight car, fell under the wheels when it started, receiving injuries from which he soon afterwards died.

*January 8 1889*—At Arundel, Charles Boeu, a trespasser, stealing a ride on top of a freight car, was knocked off by an overhead bridge, and falling under the wheels was cut to pieces.

*February 21 1889*—At Conway Junction, John F. Willey, a brakeman, stepped off a moving engine and falling under the wheels was run over and killed.

*May 30 1889*—At Portland, William McDonald, a trespasser, walking on the tracks near the transfer station bridge, was struck by a passing train, from the effects of which he soon afterwards died.

*July 21 1889*—At Old Orchard, James Sellars, while walking upon the platform, fell off, and was struck by the cars, and was slightly cut upon the head. He was intoxicated.

*July 27 1889*—At Portland, Henry B. Johnson, an employe, while coupling cars, was caught and had his arm jammed.

*August 5 1889*—At Old Orchard, Annie Whitehouse attempted to get on the cars after they had started, and falling upon the platform, hurt her side slightly.

*August 23 1889*—At Old Orchard, W. F. Fernald jumped from a moving train, cutting his face slightly.

*September 2 1889*—At Portland, John Lucy, an employe, was thrown from the platform of a baggage car by a sudden lurch of the train, and fatally injured.

*September 17 1889*—At State street crossing, Portland, Charles L. Robinson, and his son, while driving too close to the track, had his carriage struck by a car and overturned, slightly injuring both of them.

## GENERAL INFORMATION—Continued.

Length of heaviest engine and tender, from center of forward truck-wheel of engine to center of rear wheel of tender.....	45	feet.
Total length of heaviest engine and tender over all .....	35	"
Number of locomotives equipped with train brake.....	68	
Kind of brake, Westinghouse Air Brake.		
Number of cars equipped with train brake.....	153	
Kind of brake, Westinghouse Air Brake.		
Number of passenger cars with Miller platform and buffer.....	105	
Number of miles of road operated by your Company not furnished with telegraph facilities, specifying location of same:		
From Orono to Upper Stillwater, number of miles.....	3	
From Enfield to Montague, number of miles.....	3	
Are charges for the transportation of company's supplies included in the earnings as reported for your road? No.		

## BRIDGES BUILT WITHIN THE YEAR IN MAINE.

Location.	Kind.	Material.	Length.
Bowdoinham. No. 1.....	Deck plate girder.....	Iron.....	38'
*Vaughn's Brook.....	Deck plate girder.....	Iron.....	42' - 42'
Hallowell Street.....	Through riveted.....	Iron.....	100' 7½"
Two Mile Brook.....	Deck plate girder.....	Iron.....	61
Kenduskeag Draw.....	Through plate girder.....	Iron.....	100' 6"
Sunkhaze.....	Through riveted.....	Iron.....	102' 1"
Sabattis.....	Wooden trestle.....	Wood.....	426' 11"
Fitz Pond.....	Through riveted lattice.....	Iron.....	84'
Union River.....	Through riveted lattice.....	Iron.....	82'
*Center Conway.....	Through riveted.....	Iron.....	154' - 156' 3"

†Number of spans of bridges, of 25 feet and upwards.....	232½
†Number of iron bridges, aggregate length, feet, 13,119 ..	76
†Number of wooden bridges, aggregate length, feet, 11,388.....	68
†Number of bridges part wood and part iron .....	5
†Number of crossings of highways at grade.....	460
†Number of crossings of highways over railroad.....	32
†Number of crossings of highways under railroad.....	16
†Number of highway bridges 18 feet above track.....	6
†Number of highway bridges less than 18 feet above track.....	26
†Number of railroad crossings at grade, specifying each.....	8

Boston & Maine, Portland.

Portland & Rochester, Westbrook Junction.

Portland & Rochester, Cumberland Mills.

Grand Trunk, Yarmouth Junction.

Grand Trunk, Danville Junction.

Sandy River, Farmington Junction.

Whitefield & Jefferson, Whitefield.

Concord & Montreal, Scott's.

†Number of railroad crossings over other railroads. Lewiston & Auburn, at Auburn

\*Two spans.

†In Maine, on miles road owned.

GENERAL INFORMATION—*Concluded.*

## RATES OF FARE, ETC.

*Average rate of fare per mile, including season tickets, for local passengers on roads operated by this company .....	02.73 cents.
Average rate of fare per mile received from passengers to and from other roads.....	02.23 "
Average rate of fare per mile received from all passengers.....	02.47 "
Average rate of local freight per ton per mile on roads operated by this company, rates as per tariff.....	02.38 "
Average rate of freight per ton per mile received from freight to and from other roads.....	01.77 "

## STATEMENT OF EACH ACCIDENT IN MAINE.

October 10 1888—At Augusta, Mr Fitzgerald of Augusta, about seventy years of age, was run over and killed by an engine backing out of engine house.

October 16 1888—At Belfast, William Gray, a flagman, while attempting to hold a horse at crossing, was thrown against rear end of passenger-train No. 87 and injured so badly that he died a few hours later.

November 12 1888—At Livermore Falls station, Frank Burger, eleven years old, while running across the track, was struck by train No. 67, and injured so that he died the same evening. Coroner's jury exonerated company and employes from blame.

November 27 1888—About one mile south of Lewiston lower station, train No. 54 found body of Tim Walsh on the track. He was probably killed by train No. 79 or 80 of the night before. Coroner's jury attached no blame to the company or employes.

\*Rates as per tariff.

## STATEMENT OF ACCIDENTS—Continued.

*December 6 1888*—Near Pittsfield, Philip Vigue of St. Joseph, P. Q., while leaning from the platform of an express car on train No. 2, was struck by the freight platform and injured so badly that he died the same night. Vigue was stealing a ride. Coroner's jury attached no blame to the company or employees.

*December 29 1888*—At Danforth, Hiram Osgood, brakeman on train No. 55, was fatally injured by being jammed between engine and flat car. Coroner's jury exonerated the company and employees from all blame in the matter.

*January 10 1889*—At Halliwell, Arthur Ellis, ten years of age, was run over by train No. 28 while working at that station. The boy's leg was crushed at the ankle. He was supposed to be at play near by and attempted to cross the tracks.

*January 18 1889*—At Belfast, A. F. Cornforth, brakeman on the Belfast branch, while assisting to switch a snow plow, was struck on the head by the hook of the switch rope, and injured so that he died the next day.

*February 20 1889*—At Bason Mills, Fred Gulliver, of Oldtown, was found with both legs cut off below the knees after the departure of train No. 11. He was intoxicated and is supposed to have got off the train, and fallen under when attempting to get on again.

*February 23 1889*—At Kingman, Fireman H. J. Goodman of Vanceboro, Postal Clerk Mudgett of Dexter and Mail Agent John Campbell of St. John, N. B., were buried in wreck of train No. 71, and burned to death, in accident caused by a misplaced switch. Engineer Angell was severely cut and Postal Clerk Cabel Palmer had his foot jammed.

*March 7 1889*—At Rolling Mill, Patrick Norton, while on his way to his work at 6.30 P. M., was run over by an engine and had his leg crushed above the ankle.

*March 19 1889*—Near Mattawamkeag, William Kelly, brakeman, fell between the cars and had one leg crushed.

*May 29 1889*—At Skowhegan, Masaire Fortier, was run over and killed by an engine backing from the depot. Coroner's jury exonerated company and employees from all blame.

*June 10 1889*—At Crowell's brook, near Oakland, train No. 13, from Portland to Skowhegan, ran into a washout, fatally injuring Roscoe Stevens of Skowhegan, express messenger. Mail Agent Petterson of Belfast had both legs broken. Mail Agent Libby of Portland had ribs broken, and Engineer Underwood, Fireman Coburn, Baggage-master Harrigan, Brakeman Royal and Mail Agent Spear of Gardiner, received injuries more or less severe.

*July 4 1889*—At Vanceboro' yard, William Sears of Vanceboro', eighty-five years old, was run over and instantly killed by an engine backing east from the station.

*July 16 1889*—At Bangor, John Ryan of Chatham, N. B., was run over by cars handled by shifter at Bangor, and had both legs crushed below the knee. He was intoxicated and lying across the rails. Died the next morning.

*July 19 1889*—At Mattawamkeag, Thomas Higgins of St. Louis, Mo., while stealing a ride, jumped or fell from train No. 64, and had one leg cut off. He was carried to Bangor and died the same day.

*August 14 1889*—At Scott's, Will C. Collier, thirteen years old, while riding on a construction train was thrown from the cars by the starting of the engine, falling beneath the wheels was killed. He had been warned often to keep away from the train.

STATEMENT OF ACCIDENTS—*Concluded.*

*August 28 1889*—Two or three miles west of Bangor, train 71 run over the body of John Carmel. He was probably killed by train No. 2 of previous evening. A bottle of liquor was found near by.

*September 10 1889*—At South Gardiner, train No. 64 struck a team loaded with logs fatally injuring the driver, Charles N. Brown of Skowhegan.

PART III.

---

DECISIONS OF THE BOARD,

December 8, 1888, to December 31, 1889.

---

---

## DECISIONS.

---

*Decision of the Board, on petition of the municipal officers of the town of Foxcroft, to determine the manner and conditions of crossing certain highways. Decision December 8 1888.*

### STATE OF MAINE.

We, the undersigned Railroad Commissioners of the State of Maine, hereby certify that in accordance with the foregoing application, upon which notice had been given as ordered, we met at the time and place designated in said order of notice, and then and there gave a hearing to all persons and parties who appeared and desired to be heard relative to said proposed crossing, and having carefully examined the location do hereby determine that the manner and conditions of said crossing shall be as follows :

Said street or way shall be constructed so as to cross said railroad exactly at grade. The surface of the approaches on either side of said railroad track shall not be steeper than one foot in twenty.

Said crossing to be constructed and maintained within the limits of the location of said railroad, by said railroad company, so as to make the same safe and convenient for travelers on said street or way, with horses, teams and carriages, and shall also make suitable provisions for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Action of the Board, on petition of the Directors of the Presumpscot River Railroad Company, asking the approval of "Articles of Association," January 4 1889.*

Pursuant to the foregoing petition and order, the Board of Railroad Commissioners met at the time and place therein mentioned, and after a hearing, issued and endorsed on said articles of association the following certificate :

STATE OF MAINE.

We, the undersigned Board of Railroad Commissioners for the State of Maine, having carefully examined the within articles of association, and after a public hearing thereon, being satisfied that all the provisions of sections 1 and 2 of chapter 51 of the Revised Statutes have been complied with, hereby approve and endorse the same.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Dexter & Piscataquis Railroad Company, asking the approval of certain variations in their location. Decision April 12 1889.*

STATE OF MAINE.

In accordance with the foregoing application, upon which notice had been given as ordered, the Board of Railroad Commissioners met on Tuesday the second day of April A. D. 1889, at eleven o'clock in the forenoon at the time and place designated in our order of notice, and then and there gave a hearing on said application to all parties interested, who appeared for that purpose, which hearing was afterward on the same day adjourned till Wednesday the third day of April A. D. 1889 at Good Templar's Hall in Dexter in the county of Penobscot, at which time and place a further hearing was given thereon, and having carefully examined the

route of said proposed variations and changes prayed for, indicated by the accompanying map and profile, we, the said Board do hereby approve same, and order that said location be made as follows :

Change of location at western terminus, in the town of Dexter. Starting from a point on the Dexter & Newport Railroad, 275 feet north of stake "O" of the old location, and running thence by a  $3^{\circ}$  curve to the left 1033 feet to a sta. 10x33; thence by tangent N.  $16^{\circ}$  W. 267 feet to sta. 13; thence by a  $2^{\circ}$  curve to the right 1000 feet to sta. 23; thence by tangent N.  $4^{\circ}$  E. 1098 feet to sta. 33x98; thence by a  $2^{\circ}$  curve to the right 975 feet to a point on the old location designated by sta. 43x78. This proposed location is commonly known as line No. 2 and is distant from line No. 1 at sta. 23, 420 feet, which is the greatest departure between the two locations. Length of proposed change 4378 feet.

Change of location at Lily pond, so called, in the town of Dexter just north of Dexter village.

Leaving the old location at a point near the first crossing of the Dover road, designated by station 214x32 of the proposed location and running thence by a  $1^{\circ}$  curve to the left 500 feet to sta. 219x32; thence by tangent N.  $65^{\circ} 30'$  E. 168 feet to sta. 221; thence by  $4^{\circ}$  curve to the left 1400 feet; thence by tangent N.  $9^{\circ} 30'$  E. 1666 feet to sta. 250x85; thence by a  $5^{\circ}$  curve to the right 615 feet to sta. 257; thence by tangent N.  $41^{\circ}$  E. 700 feet to sta. 264; thence by a  $5^{\circ}$  curve to the left 500 feet to sta. 269; thence by tangent N.  $16^{\circ}$  E. 800 feet to sta. 277; thence by a  $3^{\circ}$  curve to the right 1300 feet to sta. 290; thence by tangent N.  $55^{\circ}$  E. 2500 feet to sta. 315; thence by a  $3^{\circ}$  curve to the left 700 feet to sta. 322; thence by tangent N.  $34^{\circ}$  E. 2510 feet to sta. 347x10; thence by a  $3^{\circ}$  curve to the right 1200 feet to sta. 359; thence by tangent N.  $70^{\circ}$  E. 1029 feet to sta. 369x29; thence by a  $3^{\circ}$  curve to the right 733 feet to sta. 376x62; thence by tangent S.  $88^{\circ}$  E. 616 feet, crossing Main stream, so called, to sta. 382x78; thence by  $4^{\circ}$  curve to the left of 591 feet to sta. 388x69

or to a point on the old location near Silver's Mill road in the town of Dexter. The greatest departure from the old location is at station 285, the distance between the two locations at that point being 3200 feet. Length of proposed change, 17,437 feet.

Change of location at Hine's Brook, in town of Sangerville, near eastern terminus.

Leaving the old location at a point south of the Borrough road, so called, and designated by sta. 677x48, of the present location and running thence by a  $5^{\circ}$  curve to the left 1610 feet; thence by a tangent N.  $66^{\circ} 30'$  W. 296 feet; thence by a  $5^{\circ}$  curve to the right 1060 feet, or to sta. 707x14; thence by tangent N.  $13^{\circ} 30'$  W. 1050 feet to sta. 717x64; thence by a  $3^{\circ}$  curve to the left 766 feet to sta. 725x30; thence by tangent N.  $36^{\circ} 30'$  W. 470 feet to sta. 730; thence by a  $5^{\circ}$  curve to the right 1500 feet to sta. 745; thence by tangent N.  $39^{\circ}$  E. joining the old location at a point designated by sta. 751x50. The greatest departure from the old location is at station 730, the distance between the two locations at that point being 540 feet. Length of proposed change 7402 feet.

By the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of Board, on petition of the Dexter & Piscataquis Railroad Company, to determine the manner and conditions of crossing certain highways. Decision April 12 1889.*

#### STATE OF MAINE.

We, the undersigned Railroad Commissioners of the State of Maine, hereby certify, that in accordance with the foregoing application, upon which notice had been given as ordered, we met at the time and place designated in said order of notice, and then and there adjourned until Wednesday the third day of April A. D. 1889, to meet at Good Templar's hall in

Dexter, in the county of Penobscot, at nine o'clock in the forenoon, at which time and place, we gave a hearing to all parties and persons who appeared and desired to be heard relative to the several crossings mentioned in said application, and having heard and considered all the evidence and arguments of counsel relative to same, and examined the location of each and all of them, do hereby determine that the manner and conditions of the crossing of said railroad over said streets and ways shall be as follows :

1. The "Dawes road," so called, shall be crossed by said railroad exactly at grade with said road or way, as it is now constructed, when said railroad is at full grade.

2. The "Sangerville road," so called, shall be crossed at grade, after said railroad company shall have excavated or lowered said road or way below the present grade, one foot and three inches, and permission is hereby granted to do same.

3. The "Guilford road," so called, shall be crossed at grade ; but said railroad company is hereby permitted to raise the grade of said road one foot and seven inches above the present grade.

4. The "Burrough road," so called, shall be crossed at grade, after the present grade of said road has been lowered at place of crossing two feet and six inches, and permission is hereby granted to do the same.

5. The "McAlister road," so called, shall be crossed at the present grade of said road, when said railroad shall be at full grade.

6. The "Starbard road," so called, shall be crossed at grade, after said road has been raised at the point of crossing, six inches, and permission is hereby granted to do the same.

7. The "Town Line road," so called, shall be crossed exactly at the present grade of said road, when said railroad shall be at full grade.

8. The "East Sangerville road," so called, shall be crossed as is provided for No. 7.

9. "The Gilman Corner road," so called, shall be crossed as is provided for No. 7.

10. The Silver's Mill road," so called, shall be crossed at grade, after said road shall have been raised at point of crossing one foot and nine inches above the present grade, and permission is hereby granted to raise same as above provided.

11. The "Avenue road," so called, shall be crossed at grade, after said road shall have been raised above its present grade six feet at point of crossing, and permission is hereby granted to fill in and raise same as above provided.

12. The "Dover road" in Dexter village, shall be crossed at grade after said road shall have been raised at each of the two points where said railroad shall cross, six inches above the present grade of said road or street, and permission is hereby granted to raise same as above provided.

13. "Grove street," so called, shall be crossed at grade and as near at right angles with said street as said crossing can reasonably be made. To facilitate said crossing, said street may be raised at point of crossing nine inches above the present grade.

14. The "Ripley road," so called, alias "Dustin street," in Dexter, shall be crossed at grade, after said street or road shall have been excavated or lowered, at point of crossing, two feet below the present grade, and permission is hereby granted to excavate as above provided.

15. "School street" in Dexter, shall be crossed at grade, after said street shall have been lowered six inches below present grade at point of crossing, and permission is hereby granted to lower the same as above provided.

16. Lincoln street in Dexter shall be crossed by a bridge over said street. Said bridge shall be constructed so as to leave a space of, at least, twelve feet between the present grade of said street and the stringers or girders of said bridge and the width of roadway between the abutments shall be, at least twenty-two feet.

17. "Main street," in Dexter, shall be crossed at grade, after the present grade of said street, at point of crossing, has been lowered six inches. Permission is hereby granted to lower the grade as above provided.

18. "Liberty street," in Dexter, shall be crossed at grade. No change to be made in the grade of said street.

19. "Shaw street," in Dexter, shall be crossed at grade after said street at point of crossing, shall have been raised six feet above the present grade. Permission is hereby granted to raise said street as above provided.

20. The "Newport road," so called, in Dexter, shall be crossed by a bridge over said road or street. Said bridge shall be constructed so as to leave a space of at least twelve feet between the present grade of said street and the stringers or floor timbers of said bridge. And the roadway between the abutments of said bridge, shall be at least twenty-five feet.

We hereby further determine and order that the surface of the approaches on either side of said railroad track where each of the several grade crossings above mentioned are permitted, shall be made as wide as said streets and ways are now constructed, and not to be steeper than one foot in twenty, except in places where the natural slopes are such as to prevent them being so constructed. All of said crossings shall be constructed and maintained within the limits of said railroad location, by said railroad company, so that the same shall be safe and convenient for travelers on said streets and ways with horses, teams and carriages, and shall also make suitable provisions for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board, on petition of the Lime Rock Railroad Company, to determine the manner and conditions of crossing certain highways. Decision June 14 1889.*

#### STATE OF MAINE.

To the Supreme Judicial Court, next to be held at Rockland, within and for the county of Knox, on the third Tuesday of September, A. D. 1889.

We, the undersigned Board of Railroad Commissioners of the State of Maine, hereby certify, that in accordance with the foregoing application and order of notice, we met at the time and place designated in said order, and it then and there appearing that notice had been given as ordered, we viewed the location of said several crossings, and gave a hearing to all persons and parties, who appeared and desired to be heard relative to the same. And it then and there appearing by evidence adduced that the petitioner's railroad, and branch track mentioned in said application, are to be wholly used for the transportation of lime-rock and other freights; that trains thereon will be run infrequently and at as low rate of speed, and that said several crossings could not be made otherwise than at grade, without subjecting the petitioners to great expense, and the public to much inconvenience, we, therefore, are convinced that said railroad may properly cross each and all of the ways mentioned in said application, at grade, and do hereby adjudge and determine, that said railroad shall be permitted to cross the streets and ways mentioned in said application at grade therewith, and that the manner and conditions of said crossings shall be as follows:

1. The crossing on Winter street shall be at grade, after said street shall have been raised, at point of crossing, four feet above the present level, said railroad to be constructed as near at right angles with said street as the same can reasonably be located, and the surface of the approaches on either side of said railroad track, is to be made and maintained by said railroad company as wide as said street now is, and not to be steeper than one foot elevation, to every twenty feet out from said railroad track.

2. The crossing on Pink street, shall be at grade, after said street shall have been raised, at point of crossing, two feet above the present level. The surface of the approaches on either side of said railroad track, is to be made and maintained by said railroad company, within its location, as wide as said street is now constructed, and not to be steeper than

one foot elevation, to every twenty feet out from said railroad track.

3. The crossing at Pearl street, to be at grade, after said street shall have been raised at point of crossing, two feet above its present level. The surface of the approaches on either side of said railroad track, to be made and maintained by said railroad company, as wide as said street is now constructed, and not to be steeper than one foot elevation to every twenty feet out from said railroad track.

4. The crossing on Sea street, shall be exactly at grade with the street as now constructed, when said railroad track shall be at full grade, and the surface of the approaches, on either side of said railroad track, shall be made and maintained by said railroad company, within its location, as wide as the same is now constructed.

5. The crossing, on or near, terminus of Lime street, to be at grade after said street shall have been raised above present level, three feet. Permission is hereby granted the railroad company to raise the street as aforesaid. The slopes and approaches on either side of said railroad track, to be made not steeper than one foot elevation, to every twenty feet out from said track. The same to be made and maintained within the location by said company.

6. The crossing on Main street, near the N. A. Burpee engine house shall be at grade after said street, at point of crossing, shall have been raised, at least two feet above the present grade or level. The approaches on either side of said railroad track, shall be made and maintained, within the railroad location by said company, as wide as the street is now, or may hereafter be constructed, and shall not be steeper than one foot elevation to every twenty feet out from said railroad track.

7. The crossing at North Main street, near the old school-house lot shall be made and maintained exactly at grade with the street as now made, when said railroad shall be at full grade, and the approaches on either side of the railroad track,

within the railroad location, to be made and maintained, as wide as they are now, or shall hereafter be made by the city authorities.

8. The crossing at Broadway, near the land of Jeremiah Hooper, to be at grade, after said street or way shall have been raised two and one-half feet above present grade or level, at point of crossing. Said way or street northerly of said crossing, shall be raised by said railroad company, so that the approach or grade from the highway culvert, to said railroad track shall not be steeper than one foot elevation to every twenty feet out from said track, and the approaches on either side shall be made and maintained within said railroad location as wide as the same are now constructed.

9. The crossing at the junction of the county road and Middle street shall be at grade after said road and street shall have been raised one foot above the present grade or level, at point of crossing, and the surface of the approaches on either side of said railroad track, shall be made as wide as the same is now, and not steeper than one foot elevation, to every twenty feet out from said railroad track.

Said railroad company shall make and maintain each and all of said crossings within the railroad location, safe and convenient for travelers on said streets and ways, with horses, teams and carriages, and shall also make and maintain suitable provision for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board, on petition of the Maine Central Railroad Company, for approval of location of branch railroad track, and to determine the manner and condition of crossing a certain highway in Brewer, Me. Decision June 18 1889.*

#### STATE OF MAINE.

To the Supreme Judicial Court, next to be held at Bangor in and for the county of Penobscot, on the first Tuesday of October A. D. 1889.

We, the undersigned Board of Railroad Commissioners of the State of Maine, hereby certify, that in accordance with the foregoing application, and order of notice, we met at the time and place designated in said order, and it then and there appearing that notice had been given as ordered, we viewed the location and route of said Branch Track, and said proposed crossing, and gave a hearing to all persons and parties who appeared and desired to be heard relative to same. It then and there appearing that the matters and things set forth in said application, relative to said Branch Track, were true. We do hereby approve the same and direct that said Branch Track be located and constructed as per plan this day approved by us, (Numbered 1). It further appearing that said Branch Track is to be used wholly for transportation of freight to and from the manufacturing establishment mentioned in said application; and that trains thereon will be run infrequently and at a slow rate of speed; and that the crossing mentioned in said application, cannot be made otherwise than at grade, without subjecting the petitioners to great, and, as we deem, unnecessary expense, and the public to much inconvenience. Therefore, we hereby determine that said Branch Railroad Track shall be permitted to cross the highway mentioned in said application, at grade therewith, and that the manner and conditions of crossing the same shall be as follows:

Said highway shall be crossed at grade, after said way shall have been raised, at point of crossing, one foot above the

present grade or level of said way. Said Railroad to be constructed as near at right angles with said way, as the line of location of said railroad track will permit. The surface of the approaches on either side of said railroad track, on said way, is to be made and maintained by said Railroad Company, as wide as the same is now constructed, and not to be steeper than one foot elevation to every twenty feet out from said railroad track, and said Railroad Company, shall make and maintain the same, within the railroad location, so that said crossing shall be safe and convenient for travelers on said way, with horses, teams and carriages, and shall also make suitable provisions for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Maine Central Railroad Company, for approval of location of branch railroad track in the town of Veazie, Maine. Decision June 18 1889.*

STATE OF MAINE.

We, the undersigned, Board of Railroad Commissioners of the State of Maine, hereby certify, that in accordance with the foregoing application and order of notice, we met at the time and place designated in said order, and it then and there appearing that notice had been published as ordered, we viewed the location and route of said Branch Track and carefully examined the map and plan thereof presented, and gave a hearing to all persons and parties who appeared and desired to be heard relative to the same, and it then and there appearing from the evidence presented to us, that all matters set forth in said application relating to such Branch Track were true. We therefore do hereby approve the location thereof, and direct that said branch track be constructed as per plan this day approved by us, (Numbered 2).

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of Board, on petition of Maine Central Railroad Company, for approval of location of branch railroad track in the town of Waterville, and to determine the manner and condition of crossing a highway. Decision June 18 1889.*

#### STATE OF MAINE.

To the Supreme Judicial Court, next to be held at Augusta in the county of Kennebec, on the third Tuesday of October A. D. 1889.

We, the undersigned Board of Railroad Commissioners of the State of Maine hereby certify that in accordance with the foregoing application and order of notice, we met at the time and place designated in said order, and it then and there appearing that notice had been given as ordered, we viewed the route and location of said proposed Branch Track and carefully examined the map and plan thereof presented, and gave a hearing to all persons and parties who appeared and desired to be heard relative to the same, and it then and there appearing from the evidence presented to us, that all matters set forth in said application relative to said Branch Track were true. We therefore now approve said location and direct that said Branch Track be constructed as per plan (No. 3) this day approved by us. It further appearing that said Branch Track is to be wholly used for the transportation of freight to and from the manufacturing establishment mentioned in said application, and that trains thereon will be run infrequent and moved at a slow rate of speed. We are therefore convinced that a crossing at grade with the highway mentioned will not materially endanger public travel on said way, and we hereby determine and direct that said Branch Track shall be permitted to cross said highway at grade therewith, and that the manner and conditions of crossing the same shall be as follows:

Said railroad track shall be laid exactly on the present grade or level of said highway, when said railroad shall be at full grade, and the surface of the approaches on either side

of said railroad track, on said way shall be made and maintained by said Railroad Company, as wide as the same is now constructed, and said company shall construct and maintain the said crossing within said railroad location in such manner that the same shall be safe and convenient for travelers on said highway with horses, teams and carriages, and shall also make suitable provisions for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk*.

*Decision of the Board on petition of the Mount Desert Railway, for revival of Charter. Decision June 18 1889.*

#### STATE OF MAINE.

We, the undersigned Board of Railroad Commissioners of the State of Maine, hereby certify that in accordance with the foregoing application and order of notice, we met at our office in Augusta, on Tuesday the eighteenth day of June, A. D. 1889, at two o'clock in the afternoon, being the time and place designated in said order, and then and there gave a hearing to the petitioners and all other persons and parties, who appeared and desired to be heard relative to the subject matter stated in said application.

After carefully considering the prayer of the petitioners and the reasons urged for the revival of their charter, we do hereby determine and order that the corporate powers and charter of the "Mt. Desert Railway" be and is hereby revived, as provided by section 3, of chapter 96, of the Public Laws of 1887.

This revival, however, is not to be construed as renewing or including the approval of location heretofore made by this Board.

Signed by the Board.

E. C. FARRINGTON, *Clerk*.

*Decision of the Board, on petition of the Dexter & Piscataquis Railroad Company, for approval of a change or variation in location. Decision July 8 1889.*

#### STATE OF MAINE.

As appears by the foregoing petition, the Dexter & Piscataquis Railroad Company, after having located their line to a connection with the Bangor & Piscataquis Railroad, and having the same approved by this Board, now asks permission to change said location from a point on the approved and located line, commencing at the Piscataquis river, in the town of Foxcroft; thence, as appears by plan submitted, curving easterly to a point, of connection with the line of the Bangor & Piscataquis Railroad, something more than a mile easterly from the one first submitted and approved by this Board. To this contemplated change of location, the Bangor & Piscataquis Railroad Company, for reasons hereinafter stated, objects. It appeared by evidence submitted at the hearing, by the petitioners, that failing to agree with Bangor & Piscataquis Railroad Company, as to an Union Station for both companies, no suitable point on their located line could be found for depot purposes, without extending their line as above described; that for business purposes and to accommodate the people of Dover, and Foxcroft, it was necessary to reach some point nearer those villages; and that having been refused the privilege of laying a track along and within the location of the Bangor and Piscataquis railroad, they desire to locate a line southerly and adjoining said railroad, for a distance of about one mile, to a locality, known as the "Parsonage" lot in Foxcroft. The objection urged by the Bangor and Piscataquis Railroad Company to this contemplated change of location, by the petitioners company, is, if we understand it correctly, that it will be a parallel road, with theirs, for more than a mile, and between their road and the village of Foxcroft, and manufacturing establishments on that side of their line; that if petitioners are permitted to so ex-

tend their line, they (the B. & P.) will in part, be deprived of business that, on account of their prior location legitimately belongs to them, and that they will be inconvenienced and hindered in locating and operating side tracks to such manufacturing establishments, etc.

While, we think, we fully appreciate the importance of the objections above mentioned, we do not think they are of sufficient weight or importance to overcome the reasons, given by the petitioners, why their prayer for approval of change of location should be granted. The matter here to be determined, is not merely the prior rights of one company or the conveniences of another, the rights of the public, and the business of that community, must be considered, as well as the convenience and interests of either corporations. We do not think it would be reasonable or public policy, to deny to one railroad corporation, reasonable terminal facilities, simply because in reaching a desirable point or locality it would have to extend its road, for a short distance, parallel with one already established. But there are other reasons why we cannot at this time approve this contemplated change of location. It appears by the plan submitted, that to make the change proposed, the road would have to be constructed at grade, across at least six public streets or ways, now crossed, at grade, by the Bangor and Piscataquis Railroad track, and at a distance of fifty feet from said track. Such a violation of the spirit and intent of chapter 282, of Public Laws of 1889 relating to railroad crossings, we cannot sanction unless sufficient reasons are shown therefor. It may be said that to cross two tracks at grade, would be but little more dangerous than to cross one. This would be true if they were along side, or near to each other, but when placed at a distance of fifty feet apart, the danger to travelers on such ways would be very much increased. It is desirable that these two roads should have a union station at such a point as would convene both, and be also convenient to the inhabitants of the villages of Dover and Foxcroft, but if such an arrangement cannot amicably be made by these two

corporations, we think a sufficient remedy is provided by chapter 120, Public Laws of 1887. If not, the objections to approval of this proposed location, above mentioned, may be overcome.

By the Board.

E. C. FARRINGTON, *Clerk*.

---

*Decision of the Board, on petition of the Dexter & Piscataquis Railroad Company, for approval of change of location, so as to avoid a highway crossing. Decision July 8 1889.*

#### STATE OF MAINE.

To the honorable Supreme Judicial Court next to be held at Bangor, in the county of Penobscot, on the first Tuesday of October, A. D. 1889.

We, the undersigned Board of Railroad Commissioners for the State of Maine, hereby certify, that in accordance with the foregoing application and order of notice, we met at the time and place mentioned in said order, and it then and there appearing that notice thereof had been given as ordered, we gave a hearing to all persons and parties who appeared and desired to be heard relative to the same.

Col. J. B. Peaks appeared as counsel for the petitioners, and Hon. Josiah W. Crosby, as counsel for the town of Dexter. Prior to said hearing, on the same day, this Board viewed the premises described in said petition, and did not deem another examination necessary and refused to do so, although requested by the counsel for the town of Dexter.

At said hearing it appeared from the evidence offered by the petitioners, that said railroad was located across said highway, as described in said petition, in order to obtain a uniform grade, though as appears, a more direct and shorter line could have been made without crossing said highway, though at great expense, by means of excavations and fills. It appeared from said view and from the evidence adduced at said

hearing, that, one, at least, of said contemplated grade crossings would be exceedingly blind and dangerous to travelers on said highway, and that the other, being so near to the first named, would be more dangerous than if the first were at a greater distance from it.

It also appeared that the probable cost of changing said highway, as prayed for in said application, and constructing same alongside of said railroad in as good condition as same is now, would be about 800 dollars. And it further appeared that there was no opposition to the proposed change, on the part of the town, provided the railroad company should be required to bear all the expense thereof. After considering the prayer of the petitioners and all the evidence adduced at said hearing, we are convinced that the course of said highway should be altered or changed as prayed for. This petition is based upon an act amendatory and additional to section 28 of chapter 51 of the Revised Statutes, (see chapter 282 Public Laws of 1889,) a part of which is as follows :

“Highways and other ways may be raised or lowered for the purpose of permitting a railroad to pass over or under the same or the course of the same may be altered so as to facilitate such crossing, or to permit a railroad to pass at the side thereof, on application to the Railroad Commissioners and proceeding as provided by section 27 of chapter 18, as amended by this act, and for such purpose, land may be taken and damages awarded as provided for laying out highways and other ways.”

By the foregoing provisions of statute, we think power is given the Board to order the change prayed for. Whether or not the Board has power to apportion or require the railroad company to pay the whole expense of such change is more difficult to determine, the change being wholly outside the limits of the railroad location. The counsel for the petitioners claims that no such power is given. While we admit the meaning of the statute is somewhat obscure, we think such power is clearly given, when the language above quoted, is considered in connection with section 27 of chapter 18, as

amended. If the above quoted statute had been incorporated into and made a part of section 27 of chapter 18 instead of part of section 28 of chapter 51, its meaning would have been clear. Section 27 of chapter 18 as amended, provides that "Townways and highways may be laid out across, over or under any railroad track, and the expense of building and maintaining so much thereof as is within the limits of such railroad, shall be borne by such railroad or by the city or town in which such way is located, or shall be apportioned between such company and city or town as may be determined by said Railroad Commissioners." As we construe the law, section 28 of chapter 51 as amended gives to the Commissioners additional powers, and provides that the "proceeding" shall be "as provided by section 27 of chapter 18 as amended." We, therefore, hereby determine and order that the course of said highway shall be altered, constructed and maintained by the town of Dexter, as follows:

Commencing at a stake marked "O" driven on the northerly side of the said highway or Dover road, so called, on the line between said road and land owned by Lafayette Bridge, being 33 feet in a southerly direction from station 217 of the Dexter & Piscataquis location; thence running by the magnet of 1889, N.  $66^{\circ} 30'$  E. 150 feet to a stake marked 1x50; thence N.  $62^{\circ}$  E. 250 feet to a stake marked "4"; thence N.  $56^{\circ}$  E. 200 feet to a stake marked "6"; thence N.  $51^{\circ}$  E. 200 feet to a stake marked "8"; thence N.  $37^{\circ}$  E. 500 feet to a stake marked "13" driven on the northerly side line of the said highway at or near its junction with the Owlsborough road, so called. The above describes the northerly side line of the said highway when altered as above provided. The southerly side line, of which is to be 66 feet or four rods distant from the above described line, and parallel with the same as shown on plan No. 5 herewith approved. Land may be taken for the above-named purpose and damages awarded as provided by law. The location of said railroad shall be changed so as to correspond with the above described line of the highway. In consideration of the advantages, which, we believe the

Dexter & Piscataquis Railroad Company will derive by reason of the foregoing described change or alteration of said highway, we hereby determine and award that said railroad company shall pay the expense of making the alteration or change aforesaid, a sum of money not exceeding eight hundred dollars; provided, however, that if said town of Dexter shall refuse or neglect to alter or change said highway, as above provided within thirty days from the date hereof, said railroad company is hereby authorized and empowered to do the same.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Dexter & Piscataquis Railroad Company, for approval of location, the same being in part upon the location of the Bangor & Piscataquis Railroad. Decision July 25 1889.*

#### STATE OF MAINE.

In accordance with the foregoing petition, upon which notice, as appears had been given as ordered, the Board of Railroad Commissioners met at the time and place designated in said order, and it then and there appearing that the Board had jurisdiction, only in part, the same is hereby dismissed.

By the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Dexter & Piscataquis Railroad Company, for approval of and change of location and terminus. Decision July 25 1889.*

#### STATE OF MAINE.

By the foregoing application, upon which, as appears, notice has been given as ordered, the petitioners again ask for an

approval of a change in the location of their railroad, from a point commencing at the Piscataquis river in Foxcroft, where their located line crosses said river, and changing the line from said point at said river, by running northerly and easterly until said line touches the located line of the Bangor & Piscataquis Railroad, east of the Dawes road, so called, and thence running easterly along the south side of the line of the Bangor & Piscataquis Railroad, parallel and adjoining the same, to a point in Foxcroft, known as the "Parsonage Lot," where the petitioners have located their depot grounds. This request is substantially the same as the one we have before refused to grant, for reasons stated in our decision relative thereto, dated June 8 1889.

While at the former hearing, this Board was strongly impressed with the belief that the route and depot grounds selected by the petitioners were the most available, we at the time refused to approve the location asked for, hoping thereby that such an amicable arrangement would be made between the petitioners and the Bangor & Piscataquis Railroad Company, as would permit the petitioners to place a track upon the location of said Bangor & Piscataquis, and thus avoid an additional railroad location in that vicinity. Failing to make such an arrangement, the petitioners again ask to have said location approved by this Board. It appeared by evidence offered on the part of the petitioners, at the hearing on the foregoing petition, that the point of connection of the petitioners' road with the Bangor & Piscataquis Railroad, as now located, is more than a mile from the business centers of the villages of Dover and Foxcroft; that no suitable ground for station purposes, approachable by the petitioners' road, other than the "Parsonage Lot" before mentioned can be found; that said lot for station purposes, would be more accessible and convenient for business purposes and accommodation of the two villages, than any other point on the line of the Bangor & Piscataquis Railroad; that by reason of natural barriers no suitable or feasible route of approach to said lot or ground can be found, except

by extending their line within the location of the Bangor & Piscataquis location, or along side thereof, for more than a mile, as prayed for in their petition, and as appears by plan submitted. It also appeared that a majority, at least, of the citizens of Dover and Foxcroft villages, favored the selection of the above mentioned lot, by the petitioners' company for depot purposes, and, so far as appears, this proposed change of location and extension is opposed only by the Bangor & Piscataquis Company. While admitting, or failing to deny the truth of the above allegations, as set forth by the petitioners, the Bangor & Piscataquis Railroad Company, by their counsel, say this Board has no authority, by statute, to approve such change; that if any such power is conferred by statute upon the Board, it should not be exercised in this case; that having made a location of their line and having had the same approved and established, they, the petitioners, should be confined to the same and not be allowed to establish new and additional lines, especially where the same will be near and parallel with the Bangor & Piscataquis Railroad, which has a prior right to the location and business established near the same. As we have before said, while we fully comprehend and appreciate the force of the objections, so urged, they do not seem to us to be sufficient to warrant us to refuse to approve the change and extension asked for by the petitioners. True the petitioners' road is a competing road and ought not to be allowed undue advantages, by way of location over the other road; but we have already determined, by a decision given November 27 1888, that public convenience required the construction of a railroad from Dexter to Foxcroft. If public convenience required that the road should be built, it certainly requires that it should be granted reasonable and proper terminal facilities, and not be shut out from the most available depot grounds, simply because some other persons or corporations had previously constructed a railroad near by. It does not appear that there are any other grounds available or suitable for station purposes, except the "Parsonage Lot" above mentioned. And, while for reasons stated

in our former decision in this matter, we have been and now are reluctant to approve this proposed change of location and extension, we are forced to do so, feeling that to compel the petitioners to locate the terminus of their road a mile or more away from the business centers of the villages of Dover and Foxcroft, would be unjust and unreasonable. It has been suggested that permission would be given the petitioners' company, by the Bangor & Piscataquis Company, to run their trains from the terminus as now located, over the tracks of the Bangor & Piscataquis Railroad to the depot of said company or to such station as said petitioners might establish. Such an arrangement, we could not approve believing as we do, that the occupation of one track by two companies operating trains for a distance of more than a mile, would be exceedingly dangerous and inconvenient. We believe it would have been better for both companies if permission had been given the petitioners' company, to lay its track or tracks within the location of the Bangor & Piscataquis, as above suggested; but this being a matter over which we have no jurisdiction or control, we hereby approve the change of location as prayed for and find that public convenience requires the same.

By the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Knox & Lincoln Railroad Company, to determine whether said corporation may take and hold certain lands needed for the business of said railroad. Decision August 15 1889.*

#### STATE OF MAINE.

Hearing August 13 1889. Counsel appearing. For the petitioners, Henry Ingalls of Wiscasset; for land owners, George B. Sawyer of Wiscasset.

The petitioners, a railroad corporation as appears by the foregoing application, asks that certain parcels of land in the

village of Wiscasset may be condemned and taken for public use as provided by section 16 of chapter 51 of the Revised Statutes. It appeared by evidence adduced at the hearing on said application, that the lands described in said application, consisted of one narrow strip of land about a rod in width, situated next southerly of the freight depot, and adjoining the railroad location, not now used for any purpose except for the deposit of rubbish, etc.; that the railroad company desired said strip of land for the purpose of making an approach from Main street along a side track there situated, to said freight depot. The other described parcel of land is a strip fifteen feet wide, on the easterly or shore side of said railroad location and depot grounds, consisting of flats and a portion of an old wharf. The reasons assigned by the petitioners for the taking of this last mentioned strip of land were to enable them to place a retaining wall for the support of the railroad embankment, and to give them the right to remove a portion of an old and unoccupied building situated on said wharf, which obstructed a view of a switch near the passenger station to approaching trains. Counsel, claiming to represent all of the parties interested in said lands having waived proof and admitted notice to all, as the law requires, insisted that the reasons given by the petitioners for taking the several parcels of land before mentioned were not sufficient in law to empower the Board to order a condemnation of said land: because it did not appear that the object for such condemnation was embraced in those enumerated in the Statutes, for which land might be taken. While we admit that there is some force in the argument to sustain the position taken by counsel for the respondents, we think the Statute is sufficiently broad to give the Board jurisdiction. The object mentioned by Statutes, for which Railroad Corporations may take and hold land, are "Land for Burrow and gravel pits, necessary tracks, side tracks, stations, woodsheds, repair shops, and car, engine and freight houses." To limit the extent of the land which might be taken to strictly the land covered by those structures mentioned, would be absurd. Such structures

without means or right of approach to them, would be useless. Such lands, in connection and in addition to the lands for objects above mentioned, necessary "for the reasonable accommodation of the traffic and appropriate business of the corporation," may, we think, under the provisions of Statute be taken. We therefore find that the objects for which the petitioners seek to take and hold the parcels of land mentioned are included in the provisions of Statute above mentioned, and accordingly issue this our certificate. We, the undersigned Board of Railroad Commissioners, hereby certify that on the thirteenth day of August, A. D. 1889, we met at the time and place mentioned in our order of notice, which we hereby refer to and make part of this our certificate, and it then appearing and admitted by counsel, appearing for all of the persons and parties mentioned in said application, that notice had been given as ordered, and was sufficient, and then and there viewed the premises mentioned in said application and gave a hearing to all persons and parties interested, who appeared and desired to be heard relative to the same, and after a full hearing of all the allegations, statements and proofs of the petitioners and of the other persons and parties mentioned in said application, or interested, and all others who appeared as such, it appeared to us and we so find, determine and certify that so much of the premises mentioned in said application as is hereinafter definitely described, is necessary for the use of said Knox & Lincoln Railroad Company for necessary tracks, side tracks, stations, and for the reasonable accommodation of the traffic and appropriate business of said corporation, viz: beginning at the northeast corner of the land of Alden Bailey; thence southerly to an iron post or bolt in the northerly line of the land of the heirs of Barker Neal deceased; thence southerly to another iron post or bolt in the southerly line of land last above named; thence easterly by said last named line to the westerly line of said railroad company; thence northerly by the last named line to the northerly line projected of said Bailey; thence

westerly by said last named line to the first bound. One other piece or lot of land bounded as follows, viz: beginning at the outside of the wall on the easterly side of the track of said railroad, in the northerly line projected of said Bailey, at the southerly side or end of an old wharf; thence easterly by the line last named fifteen feet; thence southerly, keeping the distance of fifteen feet from the outside of said wall, to the southerly line of the heirs of said Neal deceased; thence westerly by said last named line, fifteen feet to the outside of said wall; thence northerly by the easterly side of said wall to the first bound. Also another lot or piece of land bounded as follows, viz: beginning at the northwesterly corner of the lot last above described, at the easterly side of said wall, in the northerly line projected of said Bailey; thence easterly by said last named line, fifteen feet; thence northerly, keeping the distance of fifteen feet from the easterly line of said railroad, to land or flats formerly of Wales Hubbard deceased, being the northerly line of James M. Blinn; thence westerly by said last named line and land or flats, fifteen feet to the easterly line of said railroad; thence southerly by said last named line to first bound. And we further find and determine that all the above described premises, not now owned by said Knox & Lincoln Railroad Company, is and was at the time of said hearing and on the day of the date of the application and order of notice, owned by the persons and parties named in said application, and that they are the persons and parties interested therein. And at said hearing it further appeared, and we so find and determine that said Knox and Lincoln Railroad Company and the persons mentioned in said application or either of them did not agree, and had not at any time agreed, as to the necessity therefor, or the area necessary to be taken, and that said persons named or either of them, did not consent and had not at any time consented thereto, before the making of said application, though as appears, they each and all had been requested so to do by said company, before the making of said application. We therefore adjudge and determine that the premises above

described, are necessary for the reasonable accommodation of the traffic and appropriate business of said railroad corporation, and that said premises may be taken and held for the above mentioned purposes, and hereby make this our determination, adjudication and certificate of adjudication.

By the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the International Railway Company of Maine, to determine the manner and condition of crossing certain highways. Decision September 9 1889.*

#### STATE OF MAINE.

To the Supreme Judicial Court next to be held in Dover, in the county of Piscataquis, on the fourth Tuesday of September, A. D. 1889.

We, the undersigned Board of Railroad Commissioners, hereby certify, that in accordance with the foregoing application and order of notice, we met at our office in Augusta, on the seventh day of September, A. D. 1889, that being the time and place designated in said order, and it then and there appearing that notice of said hearing had been given as ordered, we gave a hearing to all persons and parties who appeared and desired to be heard relative to the same. And it then and there appearing by the evidence submitted on the part of the petitioners and others, that the highways or roads mentioned in said application, where crossed by said railroad, were a long distance from the thickly settled portions of the towns mentioned, and that each of said ways were infrequently traveled, we, therefore, determine that said ways may properly be crossed by said railroad at grade therewith, and that the manner and condition of crossings shall be as follows :

1. The crossing in Brownville, on the way leading from the village of Brownville to Katahdin Iron Works, shall be

exactly at grade, and the surface of the approaches on either side of said railroad track, shall be made and maintained by said railroad company, within its location, as wide as said way is now constructed, and not steeper than one foot elevation to every twenty feet out from said railroad track.

2. The crossing in said town of Brownville, of the way on the east side of Pleasant River and about half a mile distant therefrom, leading northerly from the village of Brownville, shall be exactly at grade, and the surface of the approaches on either side of said railroad track, shall be made and maintained by said railroad company within its location, as wide as said road is now constructed, and not to be steeper than one foot elevation to every twenty feet out from said railroad track.

3. The crossings in the township of Elliottsville known as the Monson road, shall be at grade, when said railroad is at full grade, and the surface on either side of said railroad track, shall be made and maintained by said railroad company, as wide as said way was formerly constructed, and the approach on the southerly and westerly side within the railroad location, to be not steeper than one foot elevation to every ten feet out from said railroad track, and the descent to said track on the northerly and easterly side, to be a uniform grade.

Said railroad company shall make and maintain each and all of the above mentioned crossings, within the railroad location, so that they shall be safe and convenient for travelers on said ways with horses, teams and carriages, and shall also make suitable provision for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board, on petition of the International Railway Company of Maine, for approval of a change in a certain highway crossing. Decision September 9 1889.*

STATE OF MAINE.

To the honorable Supreme Judicial Court next to be held at Bangor in the county of Penobscot, on the first Tuesday of October, A. D. 1889.

We, the undersigned Board of Railroad Commissioners of the State of Maine, hereby certify, that in accordance with the foregoing application and order of notice, we met at our office in Augusta, on Saturday the seventh day of September, A. D. 1889, being the time and place designated in said order, and it then and there appearing that notice had been given as ordered, we gave a hearing to all persons and parties who appeared and desired to be heard relative to the same. And it then and there appearing, by evidence adduced, that the facts set forth in said application were true, we, therefore, hereby determine and order that the course of the highway mentioned in said application be altered and changed as per plan, numbered 8, hereunto annexed. And we further determine and award that the expense of said alteration and change, shall be wholly borne by said railroad company; and that the crossing of said way, by said railroad, by reason of the facts set forth in said application, shall be at grade with the same, and the surface of the approaches on said way, shall be constructed and maintained by said railroad company, so that the same shall not be steeper than one foot elevation to every twenty feet out from the track of said railroad, and shall be made and maintained within said railroad location, so that said crossing shall be safe and convenient for travelers on said way, with horses, teams and carriages, and shall make suitable provisions for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board, on petition of the Rockland, Rockport & Camden Railroad Company, for revival of Charter. Decision September 9 1889.*

#### STATE OF MAINE.

We, the undersigned Board of Railroad Commissioners of the State of Maine, hereby certify, that in accordance with the foregoing application and order of notice, we met at our office in Augusta, on Saturday, the seventh day of September, A. D. 1889, at ten o'clock in the forenoon, being the time and place designated in our said order of notice, and then and there, it appearing that notice had been given as ordered, we gave a hearing to the petitioners and all other persons and parties who appeared and desired to be heard relative to the subject matter stated in said application.

After carefully considering the prayer of the petitioners, and the reasons urged for the revival of their charter, we do hereby determine and order that the corporate powers and charter of the Rockland, Rockport & Camden Railroad Company, be revived as provided by section 3, of chapter 96 of Public Laws of 1887.

Signed by the Board.

E. C. FARRINGTON, *Clerk*.

---

*Decision of the Board, on petition of the Kennebec Central Railroad Company, for approval of articles of association. Decision September 12 1889.*

#### STATE OF MAINE.

The foregoing petition and order of notice, having been presented, and it then and there appearing that notice had been given as ordered, we, the undersigned Board of Railroad Commissioners, after an examination and hearing, find and

determine that all the provisions of sections one and two of chapter 51 of the Revised Statutes, have been complied with and hereby certify and approve the same.

By the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Kennebec Central Railroad Company, for approval of location of their railroad from Randolph to Togus. Decision September 27 1889.*

#### STATE OF MAINE.

The Kennebec Central Railroad, a corporation organized and established under the provisions of law, having, as appears, complied with all the provisions of law as to organization, and having made a survey of the route of its proposed road, now presents its petition for approval of location.

At a hearing on said petition which was held at Gardiner, on the twentieth day of September, A. D. 1889, it appeared that notice on said petition had been given as ordered, and from the evidence presented by the petitioners, and from a personal examination of the proposed route made by the Board, on said day, it also appeared that a very feasible route for a railroad, had been selected, starting from the Government wharf so called, in the village of Randolph; thence running northwesterly, through said town and the town of Chelsea, to the National Home for soldiers, situated in said town of Chelsea, a distance of about five miles.

It further appeared that nearly all the heavy supplies for said Home, such as coal, beef, etc., are now carted from the point mentioned in Randolph to said Home; that by reason of such teaming, the highways of said towns are, at certain seasons of the year, much cut up and almost impassable. Said town being thereby subjected to a burden of taxation in

keeping said highways in repair; that the yearly tonnage of coal and other freight, so transported, now amounts to more than four thousand, and is constantly increasing in amount. From these recited facts, and many others which were given in evidence, which we deem unnecessary to mention, and from our knowledge of the great amount of travel to and from said Home, we are convinced that public convenience and exigencies require the construction of a railroad to and from the points above mentioned, and we, therefore, hereby approve the location of same, as appears by map and plan of route submitted and herewith approved.

By the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of J. O. Robinson, Attorney, for approval of articles of association for the formation of a railroad company to build a railroad from Warren to Union. Decision October 4 1889.*

#### STATE OF MAINE.

We, the undersigned Board of Railroad Commissioners, having considered the foregoing petition, and having found that all of the provisions of sections one and two, chapter 51 of the Revised Statutes have been complied with, do hereby approve and endorse the same.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board, on petition of the Kennebec Central Railroad Company, to determine the manner and condition of crossing certain highways. Decision October 12 1889.*

### STATE OF MAINE.

To the Supreme Judicial Court next to be held in Augusta, in the county of Kennebec, on the third Tuesday of October, A. D. 1889.

We, the undersigned Board of Railroad Commissioners, hereby certify, that in accordance with the foregoing application and order of notice, we met at the time and place mentioned in said order, and it then and there appearing that notice of said hearing had been given, as ordered, we gave a hearing to all persons and parties who appeared and desired to be heard relative to the same, after having first viewed the location of the crossings mentioned in said application. At said hearing it appeared from the evidence submitted, on the part of the petitioners, and others, and also from the view above mentioned, that the ways described in said application, except the one first mentioned, called "Water street," in Randolph, were infrequently traveled; that the character of the country over which said railroad is to be constructed, is such that but one feasible route could be selected; that by following said route or location, it did not appear practicable to cross either of the ways mentioned, otherwise than at grade with same. We, therefore, determine that each and all of said ways may be crossed by said railroad, at grade, and that the manner and conditions of said crossings, shall be as follows:

1. The crossing of Water Street in Randolph, near the "Little Togus Stream," shall be exactly at grade, after said way or street shall have been raised at point of crossing, one foot above the present grade or level (permission being hereby granted to raise the same as aforesaid), and the surface of the approaches, on either side of said railroad track, shall be

made and maintained by said railroad company, within the railroad location, as wide as said way or street is now constructed, and not to be steeper than one foot elevation to every twenty feet out from said railroad track.

2. The crossing of "Windsor Street" in the town of Randolph, shall be at grade, after said street or way, at point of crossing, shall have been raised above its present level, two feet, and permission is hereby granted to said railroad company, to raise the said street or way as aforesaid. The surface of the approaches on either side of said railroad track, shall be made and maintained by said railroad company, within its location, as wide as said way is now constructed, and not to be steeper than one foot elevation to every twenty feet out from said railroad track.

3. The crossing of the "Birmingham Road," so called, in the town of Chelsea, shall be at grade, after said road or way shall have been raised at point of crossing, five feet, and permission is hereby granted said company to raise the same as aforesaid. The surface of the approaches on either side of said track, shall be made and maintained by said railroad company, as wide as the same now are, and not to be steeper than one foot elevation to every twenty feet out from said railroad track.

4. The crossing of the way leading by the house of William Hankerson, to Chelsea Post Office, shall be at grade, after said way shall have been raised four feet, at point of crossing, and permission is hereby granted to said company, to raise same as aforesaid. The surface of the approaches to be made and maintained, by said company, as provided in No. 3.

5. The Hallowell Road, in Chelsea, shall be crossed exactly at the present grade of said way, when said railroad shall be at full grade, and the approaches shall be made and maintained, by said company, as provided in No. 3.

Said railroad company shall make and maintain each and all of the above mentioned crossings, within the limits of the *railroad location*, so that they shall be safe and convenient for

travelers on said ways, with horses, teams and carriages, and shall also make suitable provision for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

---

*Decision of the Board, on petition of the Dexter & Piscataquis Railroad Company, to determine the manner and condition of crossing certain highways. Decision November 12 1889.*

#### STATE OF MAINE.

To the Supreme Judicial Court next to be held at Dover, in the county of Piscataquis, on the last Tuesday of February, A. D., 1890.

We, the Board of Railroad Commissioners, hereby certify, that in accordance with the foregoing application and order of notice, we met at the time and place designated in said order, and after having viewed the location of the several proposed crossings mentioned in said application, we gave a hearing to all persons and parties who appeared and desired to be heard relative to same.

From the view above mentioned and the evidence submitted at said hearing, it appeared that, prior to the time of change of location of the Dexter & Piscataquis Railroad, which change, as appears, was approved by this Board, July 25 1889, said railroad had been permitted by this Board, to cross the two first mentioned ways at grade; also that the line of location, as changed, extends along the line of the Bangor & Piscataquis Railroad, within fifty feet of the same; that each of the five streets or ways last mentioned in said application, crosses said Bangor & Piscataquis Railroad, at grade. We, therefore by reason of the proximity of these two railroads, and because all of said ways cross the Bangor & Piscataquis Railroad at grade, find that it would be impracticable and unjust to

require the petitioner's railroad to be constructed over or under said ways ; nor do we think it would be practicable to change the grade of said streets or ways, so as to permit said railroad to pass over or under them, as each now crosses the Bangor & Piscataquis Railroad at grade, and both railroads being located within fifty feet of each other, must, from necessity, be constructed substantially upon the same grade.

For the above reasons, and others mentioned in former decisions, relating to approval of the change of location, although feeling that by so doing, we are permitting additional elements to those dangers already existing, we have gradually, yet reluctantly, been constrained to authorize a crossing of said ways, at grade, and do hereby authorize and permit each and all of the streets and ways mentioned in said application to be crossed, by said railroad, at grade, and determine and order that the manner and conditions of crossing the same shall be as follows :

1. The crossing of the "Guilford Road," so called, in Foxcroft, shall be at grade, after said way or road shall have been raised, at point of crossing, two and one-half feet, and permission is hereby granted to raise said road as aforesaid. The surface of the approaches, on either side of said railroad track, shall be made and maintained, by said railroad company, within the railroad location, as wide as said way or road is now constructed, and shall not be steeper than one foot elevation to every twenty feet out from said railroad track.

2. The "Dawes Road," so called, shall be crossed exactly at the grade of said road, when said railroad shall be at full grade.

3. "Forest Street," in said Foxcroft, shall be at grade, after said street, at point of crossing, shall have been raised three feet on the northerly side of said railroad track, and permission is hereby granted to said railroad company to raise said street as aforesaid. The surface of the approaches on either side of said railroad track, shall be made and maintained, by said company, within its location, as wide as said

street is now constructed, and shall not be steeper on said northerly side, than one foot elevation to every twenty feet out from said railroad track.

4. "Mechanic Street," in said Foxcroft, shall be at grade, after said street shall have been raised, at point of crossing, three feet, and permission is hereby granted to said company to raise the street as aforesaid. The surface of the approaches on either side of the railroad track, shall be made and maintained, by said railroad company, as is provided in No. 1.

5. "North Street" shall be crossed at grade, after said street shall have been raised one foot at point of crossing, and permission is hereby granted to said company to raise the grade of said street as aforesaid. The surface of the approaches shall be made and maintained as provided in No. 1.

6. "Spring Street" shall be crossed at grade after said street shall have been raised three and one-half feet, at point of crossing, and permission is hereby granted said railroad company to raise the grade of said street as aforesaid. The surface of the approaches shall be made and maintained as provided in No. 1.

7. "Summer Street" shall be at grade after said street shall have been raised two feet at point where the main line or track crosses, and three feet where said street shall be crossed by the southerly spur or side track, and permission is hereby granted to said railroad company to lay side tracks across said street, and to raise said street as aforesaid. The surface of the approaches, on either side of said track or tracks, shall be made and maintained, by said railroad company as wide as the same is now constructed and shall not be steeper than one foot elevation to every twenty feet out from said track or tracks. Said railroad company shall make and maintain each and all of the above mentioned crossings, within its location, safe and convenient for travelers on said ways, with horses, teams and carriages, and shall also make suitable provisions for the passage of surface drainage water.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board, on petition of the Rockland, Rockport & Camden Railroad Company, for approval of railroad location. Decision November 30 1889.*

### STATE OF MAINE.

The above named corporation, by law established, having made a survey of the route of their contemplated railroad, and as appears, having complied with all the requirements of law relating to same, now asks the Board to find as a matter of fact, that public convenience requires its construction, and to approve the location thereof, as provided by section 6, of chapter 51 of the Revised Statutes.

At our hearing on the application for approval of location, which was held at the Court House in Rockland, on the twenty-second day of October, 1889, and from an inspection of the route by the Board, it appeared that the route of said contemplated railroad is as follows:

Commencing at a point near the center of the village of Camden, on land of the heirs of Sarah Eastern; thence extending in a southwesterly direction through the village of Rockport in said town of Camden; thence southerly and westerly along and near the shores of the harbor of Rockport and Penobscot Bay, to a point near Maverick street in the city of Rockland; thence curving westerly and southerly around the thickly portions of said city of Rockland, to a point of connection with the Knox & Lincoln Railroad in said city, near the point where the depot of that road was formerly located.

Since the survey of the proposed route was made, the Lime Rock Railroad Company, a corporation having a charter from the Legislature, has located and built a railroad over and along a portion of the route above named, viz: from the point above mentioned on Maverick street in Rockland, to a connection with the Knox & Lincoln Railroad at substantially the above named point, as shown by the plan of survey. That the portion of the Lime Rock Railroad above

described, may and will be used by the petitioners, as a part of their contemplated road, there can be but little doubt. In any event, it does not appear that public convenience demands that two lines of railroad should be built from and to the same points, over substantially the same territory; neither did it appear by evidence offered by the petitioners, at said hearing, that it is their intention to locate or build that portion of their railroad, even if approved by this Board. That public convenience will be subserved by the construction of a railroad from Rockland to Camden, as above described, and that the business interests of the two enterprising villages of Rockport and Camden will be greatly promoted thereby, we cannot and do not doubt; but we cannot bestow authority to one corporation to locate a railroad upon territory occupied by another; neither do we deem it wise to authorize parallel roads, when one will answer all needed purposes. From the inspection above mentioned, and from the plan and profile submitted, we are convinced that the route from the point named in Camden to Maverick street in Rockland, as located, is the most feasible of any that could be selected, and that the same can be constructed by a reasonable outlay per mile.

We, therefore, find that the public convenience requires the construction of a railroad to and from the points named in the petitioners' application, and hereby approve so much of the location thereof, as lies between the point above mentioned in Camden village and Maverick street in Rockland.

Signed by the Board.

E. C. FARRINGTON, *Clerk.*

*Decision of the Board on petition of the Georges Valley Railroad Company, for approval of location. Decision November 30 1889.*

#### STATE OF MAINE.

The Georges Valley Railroad Company, a corporation organized under the laws of the State, for the purpose of constructing and operating a railroad from Union common, so called, in the town of Union in the county of Knox, to a junction with the Knox & Lincoln Railroad, in the town of Warren in said county, having made a survey of the proposed route, as set forth in their petition, ask for an approval of same, as provided by section 6, Chapter 51 of the Revised Statutes. At a hearing given by the Board on said petition, due notice of which had been published as ordered, it appeared from the plan and profile submitted, that an exceedingly feasible route had been selected, starting from the point named, in said Union, and extending down along the Georges River Valley, through a portion of said town of Union and of the town of Warren, to a junction with the Knox & Lincoln Railroad near the station of said railroad in Warren, a distance of a little over eight miles. From the evidence submitted at said hearing on the part of the petitioners, it appeared by the construction of said proposed railroad, villages containing nearly one thousand inhabitants, would be given railroad accommodations, and many important manufacturies, now existing on said proposed route, afforded railroad facilities, and that the cost of construction of said road, as appeared by the estimate of a competent and skilful engineer, would be much less per mile than the ordinary amount required in the construction of railroads in New England. The Board of Railroad Commissioners, therefore, finds that public convenience requires the construction of said proposed railroad, and approves the location thereof as shown on plan and profile submitted.

By the Board.

E. C. FARRINGTON, *Clerk.*

*Report and Decision of the Board, on petition of the Selectmen of Strong, for a separation of grade of highway with Sandy River Railroad, and determination of manner and conditions of crossing same. Decision November 30 1889.*

#### STATE OF MAINE.

To the honorable justices of the Supreme Judicial Court next to be held at Farmington, on the first Tuesday of March, A. D. 1890.

The petitioners, the selectmen of the town of Strong, in the county of Franklin, presented to the Board, on the fifth day of October, A. D. 1889, a petition setting forth that they had laid out a town way within the limits of that town, passing under the track of the Sandy River Railroad Company; that the same had been legally accepted by the inhabitants of said town; that said municipal officers and said Sandy River Railroad Company were unable to agree as to the manner and conditions of said town way crossing said company's right of way, and as to the expense of building and maintaining same, etc., and praying the Board, after notice and hearing, to determine the manner and condition in which the said town way should cross the right of way, under the track of the said railroad company, and whether the expense of building and maintaining the same should be borne by said railroad company or by said town, or that the same should be apportioned between them as provided by law.

On the reception of said petition by the Board, a hearing was appointed to be held at Porter's Hall, in the town of Strong, on the fifteenth day of October, A. D. 1889, at nine o'clock in the forenoon, and notice thereof was ordered to be published in the Farmington Chronicle, a newspaper published in Farmington in said county, five days before the day of said hearing. On said fifteenth day of October, the Board of Commissioners met at the time and place mentioned in said order, and it then and there appearing that notice of same had been

given as ordered, the Board viewed the location of said way and gave a hearing to all persons and parties who appeared for that purpose. W. Fred P. Fogg, Esq., of Strong, appeared as counsel for the petitioners, and P. A. Sawyer, Esq., of Phillips, for the Sandy River Railroad Company.

The application of the petitioners, is founded upon the provisions of section 27, of chapter 18 of the Revised Statutes, as amended by chapter 310, of Public Laws of 1885, and chapter 282, of Public Laws of 1889, which section as amended is as follows :

“SEC. 27. Town-ways and highways may be laid out across, over or under any railroad track, in the same manner as other town-ways and highways, except that before such way shall be constructed, the railroad commissioners, on application of the municipal officers of the city or town wherein such way is located, or of the parties owning or operating the railroad, shall upon notice and hearing, determine whether the way shall be permitted to cross such track at grade therewith or not, and the manner and condition of crossing the same, and the expense of building and maintaining so much thereof as is within the limits of such railroad shall be borne by such railroad company, or by the city or town in which such way is located, or shall be apportioned between such company and city or town, as may be determined by said railroad commissioners. Said commissioners shall make a report in writing of their decision thereupon to the supreme judicial court, at its next succeeding term to be held in the county wherein such crossing is situated, and also shall make a report of such rulings, proofs, and proceedings as either party desires, or as they deem necessary for a full understanding of the case.”

At said hearing it appeared from evidence introduced by the petitioners, and also by the view aforesaid, that at the point where petitioners desire to have said way pass under said railroad track, said track is now crossed at grade by the highway leading from Strong Village to Farmington; that said highway, at the time the railroad was built,

was raised at said point, from three to five feet, so as to permit a crossing of same at grade ; that at said point, the new way mentioned in said application, intersects with the highway aforesaid, and also with the highway leading from Strong Village to New Vineyard, thus making a crossing for several ways at the point aforesaid. It also appeared that by reason of a deep cut through the hill, southerly of said crossing, on the line of said railroad, trains of cars cannot be seen by persons approaching said point, on either of said highways, and as appeared from the testimony of several witnesses who frequently traveled on said highways, said crossing was, by them, considered exceedingly dangerous ; that the approaches to said railroad track, on either side as now constructed, are very steep and inconvenient for travelers with loaded teams or carriages to pass over. For the reasons above stated and many others given in evidence at said hearing, which we deem unnecessary to mention here, the Board are convinced that the public interests require that the prayer of the petitioners should be granted, and that the way mentioned in said application can and ought to be constructed, so as to pass under said railroad track at the point mentioned, not merely on account of the construction of the new street or way ; but, more than that, for the purpose of doing away with what the Board considers a dangerous and inconvenient grade crossing now existing at that point.

At said hearing it did not appear that the Sandy River Railroad Company opposed the construction of said way under their railroad track, as prayed for, provided the expense of excavation, construction and maintenance of retaining walls and railroad bridge, etc., should be wholly borne by the town of Strong.

It is provided by the foregoing statute that in such cases "The expense of building and maintaining so much thereof as is within the limits of such railroad shall be borne by such railroad company, or by the city or town in which such way is located, or it shall be apportioned between such company, city or town, as may be determined by said railroad

commissioners." Having determined to grant the prayer of the petitioners in this case, and that the street or way shall be constructed under said railroad track, upon whom should the burden of expense rest? Surely, not upon either party alone. The change will be beneficial to both the public and the railroad corporation.

By the change, the highway that existed before the building of the railroad, and this new street intersecting with it, at this point, will both pass under the railroad track. The travelers on these ways will be relieved of the inconvenience and dangers of this blind grade crossing, and the railroad corporation will also be relieved of the liability now resting upon it, in case of accident at said crossing. The highway above mentioned existed for many years before the railroad was built, and to enable said railroad to cross said way at grade, as before stated, said way has been raised by said corporation, from three to five feet, thus relieving the corporation of the expense of locating and constructing their railroad, so as to pass over said way; but at the same time, subjecting the travelers on said way, to great inconvenience and danger. Having, therefore, carefully considered the rights and liabilities of all parties interested, it is our opinion and judgment that the expense of making the change aforesaid, should be equitably apportioned between said town of Strong and the Sandy River Railroad Company. And in accordance therewith, we direct and order as follows:

Said Sandy River Railroad Company shall raise the grade of said railroad three feet at the point where the same crosses said street or way, and shall excavate and remove the embankment under said railroad track, within the location of said railroad track, to a depth of, at least, ten feet below the present grade of same and of sufficient width to give a road way for travel under said track, when fully completed, of at least twenty feet in width. Said company shall also erect and maintain suitable abutments and retaining walls on each side of the space for travel above mentioned, upon such lines and angles as will most nearly

convene the travel on each and all of the streets and ways intersecting at said point, and shall also erect and maintain a suitable and safe stringer or other bridge for said railroad, over the way aforesaid, and at such height above the same that there shall be a space of, at least, twelve feet from said roadway or street, to the lower part of said railroad bridge superstructure; all of which shall be performed by said railroad company, in such a manner as to receive the approval in writing of this Board.

Said town of Strong, upon the completion of the work above specified and immediately after the same shall have been approved, as aforesaid, shall pay to said corporation the sum of five hundred dollars, which sum this Board determines and awards as the just proportion of said expense to be borne by said town.

By the Board.

E. C. FARRINGTON, *Clerk.*

APPENDIX.

---

PUBLIC LAWS OF 1889

RELATING TO

RAILROADS.

---

---

# RAILROAD LAWS, 1889.

## Chapter 216.

An Act relating to the Protection of Railroad employes at frogs and guard rails.

*Be it enacted by the Senate and House of Representatives in Legislature assembled, as follows :*

SEC. 1. Every railroad corporation operating a railroad or part of a railroad in this state, shall, before the first day of January, in the year eighteen hundred and ninety, adjust, fill or block the frogs and guard rails on its track, with the exception of guard rails on bridges, so as to prevent the feet of the employes from being caught therein. This work shall be done to the satisfaction of the railroad commissioners.

SEC. 2. Any railroad corporation failing to comply with the provisions of this act, shall be punished by a fine of not less than one hundred dollars, nor more than five hundred dollars.

Approved February 23, 1889.

---

## Chapter 261.

An Act to amend sections seventy-three and seventy-four of chapter fifty-one of the Revised Statutes, relating to disorderly conduct on Railroad Trains.

*Be it enacted by the Senate and House of Representatives in Legislature assembled, as follows :*

SEC. 1. Section seventy-three of chapter fifty-one of the Revised Statutes, is hereby amended by adding after the word "cars," in the second line of said section the words 'or street

railroad car,' so that said section as amended, shall read as follows :

Sec. 73, c. 61,  
R. S., amended. 'SEC. 73. Whoever behaves in a disorderly or riotous manner while on any train of railroad cars or street railroad car, or uses indecent or profane language in such car, is guilty of a breach of the peace, and shall be Penalty for disorderly conduct on railroad or street cars. fined not less than five nor more than five hundred dollars, or imprisoned in jail not less than thirty days nor more than one year, in addition to any other penalty provided by law.'

SEC. 2. Section seventy-four of chapter fifty-one of the Revised Statutes, is hereby amended by adding after the word "railroad," in the first line the words 'or street railroad car,' so that said section as amended, shall read as follows :

Sec. 74, amended. 'SEC. 74. The conductor of a train of cars on any railroad or street railroad car, may arrest and temporarily Conductor may arrest and hold such offender. hold any person guilty of such breach of the peace, until a warrant can be obtained, or he can be placed in custody of the proper officers of the law.'

Approved March 6, 1899.

## Chapter 267.

An Act to create a lien on Railroad Ties and Ship Knees.

*Be it enacted by the Senate and House of Representatives in Legislature assembled, as follows :*

Lien on railroad ties and ship knees created, in favor of persons hauling same. SEC. 1. Whoever labors in the manufacturing of railroad ties and ship knees, or is engaged in cooking for persons engaged in such labor, or furnishes a team for the hauling of said railroad ties and ship knees, has a lien on said railroad ties and ship knees for the amount due him for his personal labor thereon, or that of his team, which takes precedence of all other claims, except liens reserved to the state. Said lien shall continue for Shall continue thirty days. thirty days after said railroad ties are on the line of a railroad, or after said ship knees are delivered in a ship yard.

SEC. 2. Section forty-two of chapter ninety- Sec. 42, c. 91,  
R. S., made  
applicable.  
one of the Revised Statutes, is hereby made appli-  
cable to suit brought to enforce the foregoing lien.

Approved March 7, 1889.

### Chapter 275.

An Act relating to heating and lighting passenger cars on railroads

*Be it enacted by the Senate and House of Representatives  
in Legislature assembled, as follows :*

SEC. 1. No passenger, mail or baggage car on Method of  
heating cars  
shall be  
approved by  
R. R. commis-  
sioners.  
any railroad in this state shall be heated by any  
method of heating or by any furnace or heater,  
unless such methods or the use of such furnace or heater  
shall first have been approved in writing by the board of rail-  
road commissioners; provided, however, that in no event  
shall a common stove be allowed in any such car, Common stove  
shall not be  
used.  
and provided also, that any railroad corporation  
may, with the permission of said board, make such experi-  
ments in heating their passenger cars as said board Experiments  
may be per-  
mitted.  
may deem proper.

SEC. 2. No passenger car on a railroad shall be Lighting by  
naphtha  
prohibited.  
lighted by naphtha nor by an illuminating oil or  
fluid made in part of naphtha, or which will ignite at a tem-  
perature of less than three hundred degrees Fahrenheit.

SEC. 3. Any railroad corporation violating any Penalty for  
violation.  
of the provisions of this act, shall forfeit a sum  
not exceeding five hundred dollars.

Approved March 8, 1889.

## Chapter 282.

An Act additional to and amendatory of chapter three hundred and ten and three hundred and twelve of Laws of eighteen hundred and eighty-five, relating to Railroad Crossings.

*Be it enacted by the Senate and House of Representatives in Legislature assembled, as follows:*

Sec. 27, c. 18,  
R. S., as  
amended by  
c. 310, laws of  
1885, further  
amended.

SEC. 1. Section twenty-seven of chapter eighteen as amended by chapter three hundred and ten of laws of eighteen hundred and eighty-five, is hereby amended, so as to read as follows:

Ways crossing  
railroad tracks,  
how laid out.

‘SEC. 27. Town ways and highways may be laid out across, over, or under any railroad track, in the same manner as other town ways and highways, except that before such way shall be constructed, the railroad commissioners, on application of the municipal officers of the city or town wherein such way is located, or of the parties owning or operating the railroad, shall upon notice and hearing,

—manner and  
conditions of  
crossing to be  
determined by  
R. R. commis-  
sioners.

determine whether the way shall be permitted to cross such track at grade therewith or not, and the manner and condition of crossing the same, and the expense of building and maintaining so much thereof as is within the limits of such railroad shall be borne by such railroad company, or by the city or town in which such way is located, or shall be apportioned between such company and city or town, as may be determined

—expense of  
building, how  
borne.

by said railroad commissioners. Said commissioners shall make a report in writing of their decision thereupon to the supreme judicial court at its next succeeding term to be held in the county wherein such crossing is situated, and shall also make a report of such rulings, proofs, and proceedings as either party desires, or as they deem necessary for a full understanding of the case.

Presiding  
justice may  
accept, reject  
or recommit  
report or send  
case to a new  
commission, etc.

The presiding justice at such term of court may accept, reject, or recommit said report, or send the case to a new commission, or make such other order or decree as law or justice may require, and to his ruling or order, either party may file exceptions. The

final adjudication in such cases shall be recorded as provided in section thirty of this chapter. Costs may be taxed and allowed to either party at the discretion of the court.'

SEC. 2. Section twenty-eight of chapter fifty-one of the Revised Statutes, as amended by chapter three hundred and twelve of laws of eighteen hundred and eighty-five, is hereby amended, so as to read as follows :

'SEC. 28. Railroads may cross highways or townways in the line of the railroad, but cannot pass along them without leave of the town, but when a railroad is hereafter laid out across a highway or other public way, it shall be so constructed so as to pass either over or under such way, unless the railroad commissioners after notice and hearing authorize a crossing at grade. Before entering upon the construction of any railroad, the manner and conditions of crossing shall be determined as provided by section twenty-seven of chapter eighteen as amended. But no crossing of a street in a city, not a highway, shall be made without the written consent of the mayor and aldermen. Crossings not so made are nuisances, and may be so treated, and the directors of railroad corporation making them, are personally liable.'

SEC. 3. Highways and other ways may be raised or lowered for the purpose of permitting a railroad to pass over or under same, or the course of the same may be altered so as to facilitate such crossing, or to permit a railroad to pass at the side thereof, on application to the railroad commissioners, and proceed—proceedings. ing as provided by section twenty-seven of chapter eighteen as amended by this act, and for such purpose, land may be taken and damages awarded as provided for laying out highways and other ways.

Sec. 28, c. 51,  
as amended by  
c. 312, laws of  
1885, further  
amended.

Crossings of  
highways and  
streets, how  
made.

Ways may be  
raised or  
lowered, etc.,  
on application  
to R. R. com-  
missioners.

## Chapter 313.

An Act amendatory of section one hundred and thirteen, chapter fifty-one of the Revised Statutes, and additional to said chapter, relating to Railroad Commissioners.

*Be it enacted by the Senate and House of Representatives in Legislature assembled, as follows:*

SEC. 1. Section one hundred and thirteen of chapter fifty-one of the Revised Statutes, is amended, so as to read as follows:

SEC. 113. The governor with the advice and consent of the council, shall appoint three railroad commissioners who shall act as a board and hold their offices for three years; one of them shall be learned in the law and appointed and commissioned as chairman; one of them shall be a civil engineer who shall have had experience in the construction of railroads; and the third shall have had experience in the management and operation of railroads. Said board shall be provided with an office and suitable rooms for hearing in—expenditures. which its record shall be kept; the board may expend a sum not exceeding two thousand dollars annually in procuring necessary books, maps, stationery and statistics, and in defraying expenses incidental and necessary to the discharge of its duties and procuring the assistance of a mechanical expert in the examination of iron bridges. A statement of such expenses shall accompany its annual report.

Said board shall also have a clerk to be appointed by the governor on the recommendation of the board, who shall keep a full and minute record of its proceedings. The compensation of said commissioners and clerk, which shall be in full for services to be performed by them, shall be two thousand dollars per annum for each commissioner, and twelve hundred dollars per annum for the clerk, payable quarterly from the state treasury.'

Sec. 113, c. 51, amended.

Railroad Commissioners, their appointment and tenure.

—qualification.

—shall keep record.

Clerk, appointment of.

Compensation of commissioners and clerk.

May employ experienced engineer to examine bridges.

SEC. 2. Every railroad corporation shall, when requested by the railroad commissioners, have an examination made of any iron bridge or other

structure, by a competent and experienced mechanical engineer, who shall report to the board of commissioners forthwith the results of his examinations, his conclusion and recommendations, and transmit a copy of the same to the corporation. The report shall furnish such information in detail, and with such drawings and prints as may be in writing, requested by the board of railroad commissioners.

SEC. 3. Any railroad corporation within this state shall furnish all reasonable facilities to the board of commissioners for the prompt and faithful discharge of the duties pre-cribed under this act.

SEC. 4. Every railroad company operating any railroad in this state, shall pay to the treasurer of the state a tax in addition to all taxes now provided by law, such a sum as shall be its pro rata part of the amount of the salary and salary of clerks and expenses of the said railroad commissioners, as provided in section one, to be determined by the governor and council on or before April first of each year, according to the gross transportation receipts of any such railroad company in this state, as returned to the railroad commissioners for the year ending September thirtieth, preceding the levying of such tax. The governor and council shall report the same to the treasurer of the state, who shall forthwith give notice thereof to every railroad company operating any railroad in this state, and said tax shall be payable on the first day of July next after the levy is made.

SEC. 5. All parts of chapter fifty-one of the Revised Statutes, and any amendments thereto, so far as they are inconsistent with the provisions of this act, are hereby repealed.

Approved March 13, 1889.
